CONTENTS OF PACKAGE

- (2) Left and Right Arms
- (2) Footpegs
- (2) M10 x 1.5 x 90mm Long Socket Screw
- (2) Clearance Spacer

INSTALLATION INSTRUCTIONS

NOTE: Due to the various mounting preferences and variety of bikes out there, fabrication of your frame mount, and actation rods, etc., is the responsibility of the installer of these units.

Actuation arms feature (16) adjustment positions retained by pins, that can be set up easily due to our hex nut system being on the outside, (not the inside)...Also, the entire assembly can be removed from the bike, due to all of the hardware being accessed from the outside with allen wrenches, instead of having to "get behind" the assy. with difficult to reach fasteners.

(2) positions are available for the "shift / brake" pegs.....The farthest position is ideal for "large footed" riders. 5 3/4" (146 MM) centerline distance (from shift peg center to foot peg center.)

16 Available Arm Rotational Positions
