NOTE: USE MEDIUM THREAD LOCKER ON ALL HARDWARE

DISCLAIMER: Joker Machine denies any responsibility for any issues that may be caused from failure to use liquid thread locker on all hardware listed below

TOOLS NEEDED

- 5/16 12 Point Wrench
- 1/8 Allen Key/Driver
- Medium Thread Locker (Loctite)
- Retaining Ring Pliers

Installation is easier in some cases if you remove the footpeg from mount first.

1. Remove stock footpegs with retaining ring pliers.
2. Install Joker Machine footpegs with stock pin, spring and retaining ring.

NOTE: There is a spring lock hole on Joker Machine peg mount.

3. Loosen 1/4" set screws found on the bottom of some footpegs, and 5/16" 12 point screw. This will allow you to adjust the peg.
4. Adjust footpeg to desired position and firmly tighten down 5/16" 12 point screw or 1/4" set screws.
