P Alert Alarm Action Chart

This chart is formulated using ESR values. We have calculated the area coverage for a 100sqm dwelling. There are many factors we can not calculate for example: Room size, proximity from the P Alert Alarm, air flow (doors, windows). Taking these factors into consideration this is a guide only.

P Alert Alarm Activated	Immediate action recommended*
0 – 30 ppm Low	Recommend waiting for next weekly report. If level is higher contact tenant.
30 – 100 ppm Medium	Recommend contacting tenant.
100 – 200 ppm Medium High	Recommend contacting tenant immediately.
200 – 500 ppm High	Immediate action is highly recommended.
500 ppm and above High (possible meth manufacturer)	Immediate action is highly recommended.

* P Alert accepts no responsibility for any damage, loss, liability or injury of the information and materials contained in this document.
