Re: Quick Feedback Form from http://www.sdge.com (KMM8995070I75L0KM)

Hi Karen,

Smart Meters are dangerous to the health of young children especially.

I don't know why there would be an Initial fee since I did not authorize replacement in the first place.

Please remove and re-install the original meter and I agree to the monthly meter reader fee.

Dear xxxx Brice.

Thank you for your email.

The state of California has asked all utilities to change out existing electric and natural gas meters with new, digital smart meters as part of its energy action plan. Smart meters and the information they provide can help save energy on high-use days, keeping the lights on for everyone.

The California Public Utilities Commission (CPUC) approved SDG&E's filing to allow residential customers to opt-out of their smart meter.

The opt out costs include the charge to install and/or field check the analog meter as well as the costs associated with maintaining two separate meter programs. In addition, the monthly fee covers the costs of manually reading the meter on a monthly basis.

The current interim fees to opt out are:

Non-CARE Customers

Initial Fee \$75.00 Monthly Fee \$10.00/month

CARE Customers

Initial Fee \$10.00 Monthly Fee \$5.00/month

If you agree to these terms, please respond with your contact phone number and we can start the opt out process for you.

If there is anything further we can assist you with, please reply to this e-mail or call our 24-hour Customer Contact Center at (800) 411-7343 and an Energy Services Specialist will assist you.

Thank you,

Karen San Diego Gas & Electric A Sempra Energy Utility www.sdge.com
