

1. **Lyfe Planter:** 12-sided geodesic planter is molded from silicone, making it grippy and tactile. As it rotates in mid-air, different shades appear, providing a hypnotic and relaxing experience for your home or office. Watch your plant twirl in the air, and experience it from different angles.

2. **Lyfe Reservoir:** To mitigate against over-watering, a cleverly designed drainage system allows water to escape to a hidden, inner reservoir.

3. **Lyfe Magnet:** This is where the magic happens, a custom shaped Lyfe magnet pushes up against an electromagnetic base, causing the planter to levitate in mid-air, lifting the Lyfe planter to new dimensions.
