

## LED Bulb Element Replacement

**WARNING:** To avoid danger of suffocation, keep this plastic bag away from babies and children. Do not use this bag in cribs, beds, carriages or play pens. This bag is not a toy. Additionally, the LED Element contained therein should be properly stored away from children.

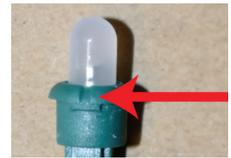

1. With the string lights ON, make a note (by using masking tape or color tape/wire) of the position of each defective LED bulb.
2. Make sure that the bulb(s) you have received are of the same position as the defective bulb in the string. (Example: If bulb #4 is 'burnt out', you should have requested a bulb for the #4 slot.)

3. **Unplug the string light set**, and remove the plastic bulb topping.
4. For C9 bulbs: Unscrew the topping counter-clockwise.
5. For Icicles: Pull gently on the green plastic lock, until it is clear from the plastic tab. Gently pull-down and remove the Icicle.

6. With a pair of pliers, grasp the Green 'cap' of the LED. DO NOT grasp or pinch the white, glass portion of the LED element. Gently pull the LED element away from the slot. Please properly dispose as electronic waste.
7. Take the replacement element from the plastic bag, and note the position of a small, vertical notch in the Green 'cap'.
  - For Icicles: The notch in the Green 'cap' should face the Icicle 'lock'.
  - For C9: The notch should align with a vertical notch at the base of the C9 slot.
8. Gently press the LED inward, until it is firmly in place, and within a millimeter of the slot base.
9. Replace the topping.
10. Repeat this for every Element that requires replacement. DO NOT plug in and turn ON the string light until every element is replaced.
11. Once complete you can proceed to using your string lights. The replacement process does not affect the light's programming or the WiFi D-Light app.
12. Please save the additional LED Element for future use.

If you have any questions about installation, visit the [Novolinkinc.com](http://Novolinkinc.com) website STEP-BY-STEP guide for the WiFi D-Lights app. (You can scan the QR code below to go directly to the page.) Also, you can email us at [www.cs@novolinkinc.com](mailto:www.cs@novolinkinc.com).
