

TIMEMORE
BLACK MIRROR mini

THE EVOLUTION OF COFFEE SCALE

Faster | Lighter | Thinner

A revolutionary form for pour-over and espresso

15.8mm super-thin body

Providing more space for a better brewing experience

Ground-breaking “cubical” scale with
TIMEMORE’s classic minimalist design, suitable for espresso machines

Thickness of 15.8mm

Small in Size, Easy to hold

10cm

Mini Size

192g

Light-weighted

▲ BAISC +

▲ BAISC Mini

Incredibly Portable

With its small and compact size, easy to carry around

Easy to Switch between Espresso & Pour-Over Mode

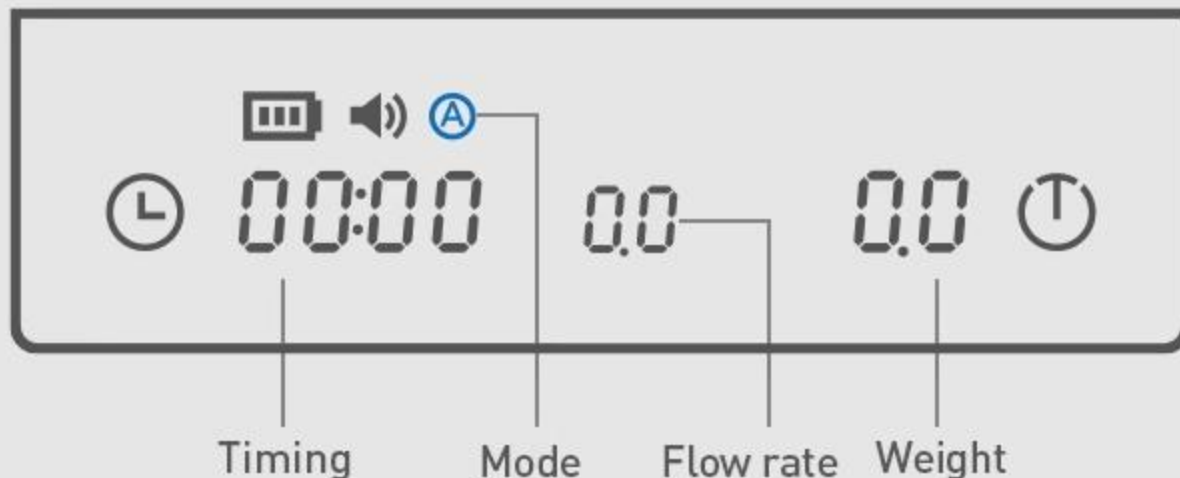

Pour-Over Timing Mode

Quick-press the timer button 5 times until you hear the beep, auto-timing mode starts.

Exclusively designed for Pour-Over

Enters timing mode automatically
Flow Rate Function

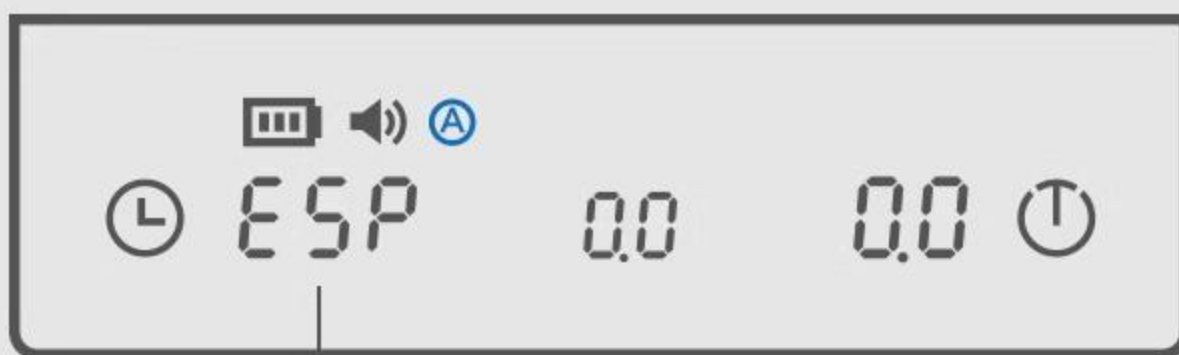

Espresso Timing Mode

Quick-press the timer button 5 times, you are now on Espresso Timing Mode

Built for espresso extraction

Automatically detects espresso extraction
Auto zeroing and timing Flow Rate Function

Espresso Mode indicator

Timing

Flow rate

Weight

Automatic timing Indicator Flashing

High-Precision Weighing

Built-in high-precision pressure sensor

An accuracy of 0.1g for precise and rapid weighing

*Starting weight: 0.3g, tolerance level recorded in the parameter table at the bottom of the page

Rapid response

Upgraded main chip for faster and more responsive operations.

泰摩咖啡®

Newly Designed drainage silicone pad

Increased water storage design with excellent
water proof and skid proof feature.

Heat-resistant pad, easy to clean

One pad with multiple purposes

Flip it over to support the handle

Big capacity Lithium Battery

Long-lasting guaranteed

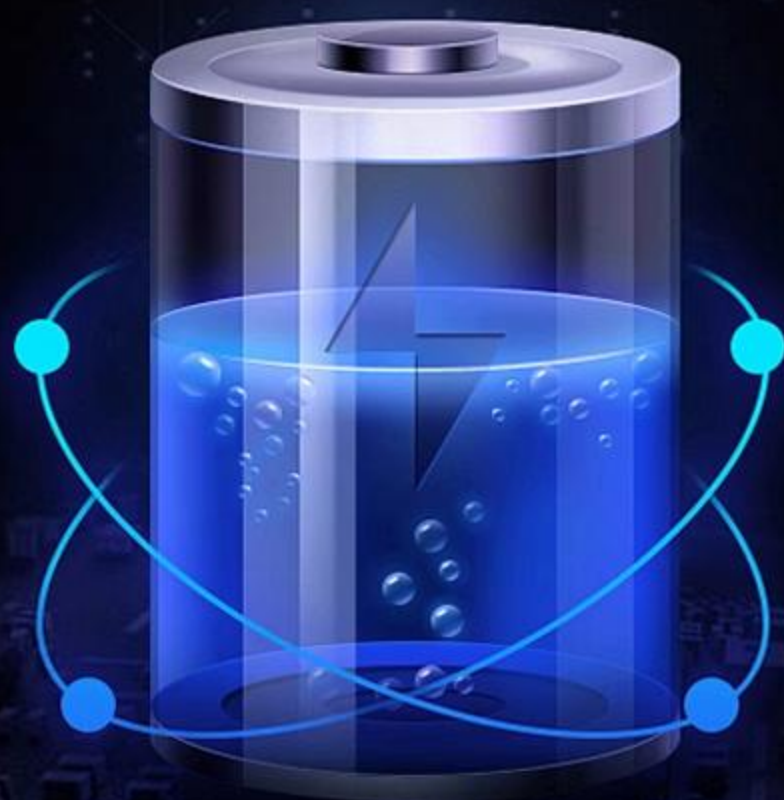

760mAh lithium battery that enables 20-hour continuous use Under full power, it can be used 240 times

760mAh

20h

240次

High-capacity Long-term battery times under full power

Thoughtful Protection

Designed with water proof features, IPX3 certified

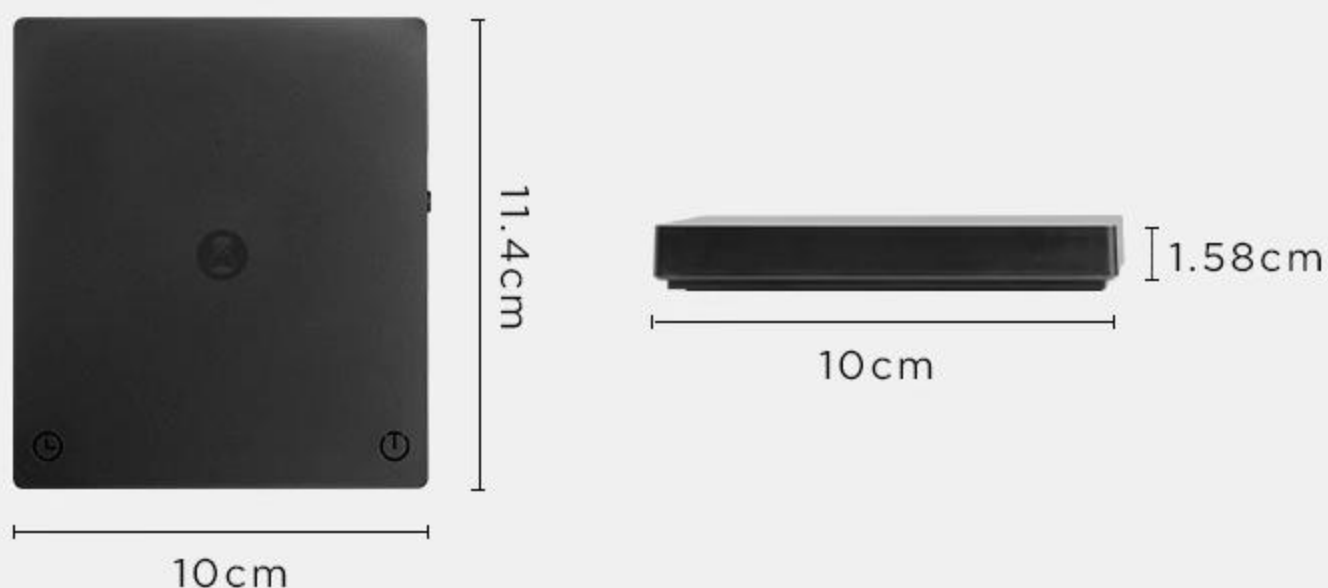

Charging port covered with silicone plug

LED backlight display

LED backlight display, clear and energy efficient,
easy to read

product parameters

NAME:

TIMEMORE BLACK MIRROR Mini Coffee Weighing Platform

WEIGHT:

Around 192g

BATTERY:

760mAh

Maximum Load:

Up to 2 kg

Parameters: 10cm*11.4cm*1.58cm

SIZE: 0.5g(0.5-500g)1g(500-1000g)3g(1000-2000g)

*The above measurements are for your reference only, please refer to the actual product for exact specifications

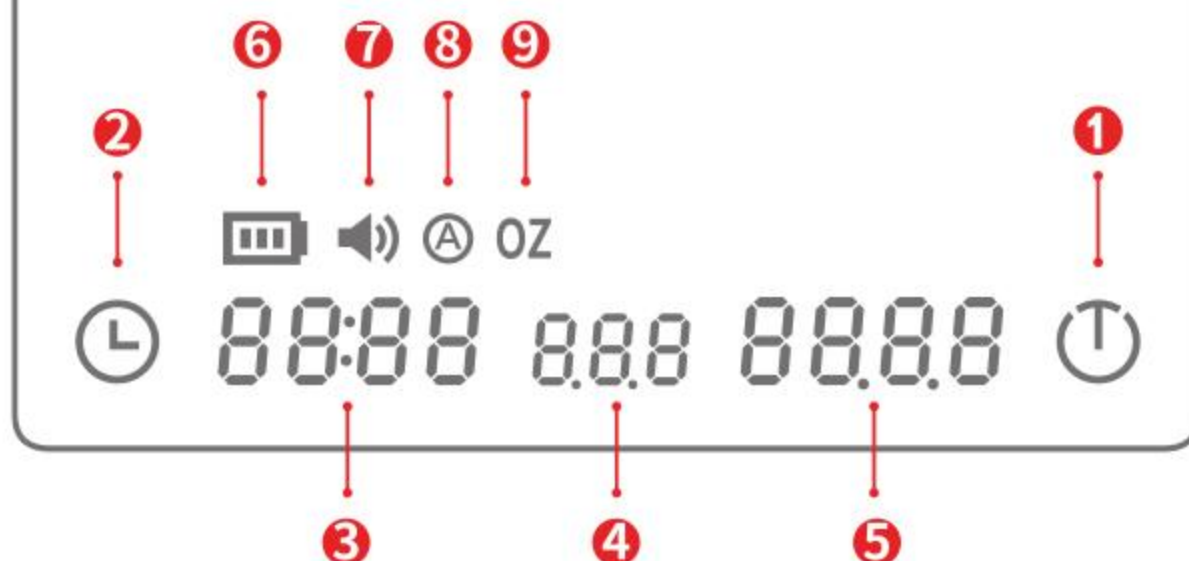

Remark:

Please remove 4 protection white silicone sheets and the STICKER before use.
The data might be effected if you don't remove.

MORE TIME FOR COFFEE LIFE

The base is a minimal-design platform with two touch keys

- 1** Power/Tare Button: Press to power on
Quick press to tare
Long press to power off
- 2** Timer Button: Quick press to start/pause timing
Long Press for 1 second to reset timer
Long Press for 5 seconds to turn on/off the beep
Default is Regular Mode, Quick press 5 times, switch to Espresso Mode, Pour-over timing Mode
- 3** Timing: To record time (Max. 59min 59s)
- 4** Flow rate: To show flow rate (Max. 99.9g/s)
- 5** Weight: Shows weight up to 2kg
- 6** Battery indicator: Indicates the current power
(please charge in time when power is low)
- 7** Sound indicator: Indicates the sound prompt is on
- 8** Auto timing mode indicator: Indicates Auto timing mode is currently on
- 9** Unit indicator: Default unit is gram. (no indicator)
Switch the unit between gram and ounce, quick press the Power button 6 times after it' s zeroed.

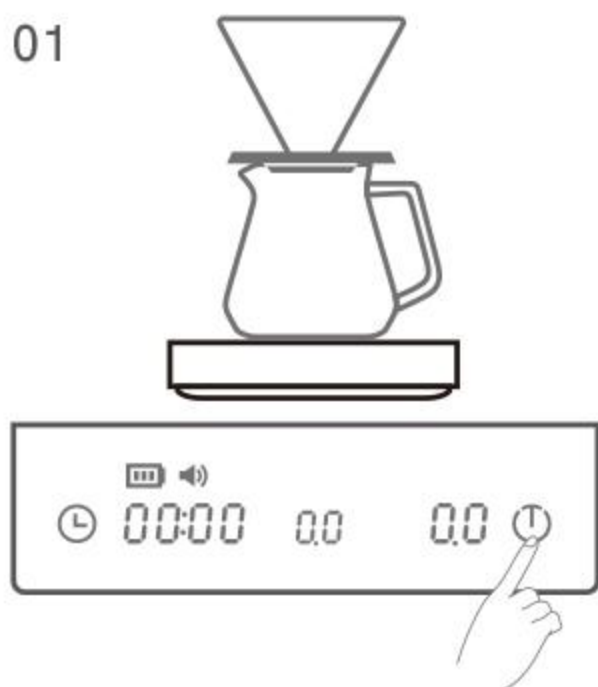

PS: The operation label shows each function and description of each button.
It can be removed after you are familiar with the operations.

Default is Regular Mode, Quick press 5 times, switch to Espresso Mode, Pour-over timing Mode

Regular Mode

Below steps are for your reference only.

01

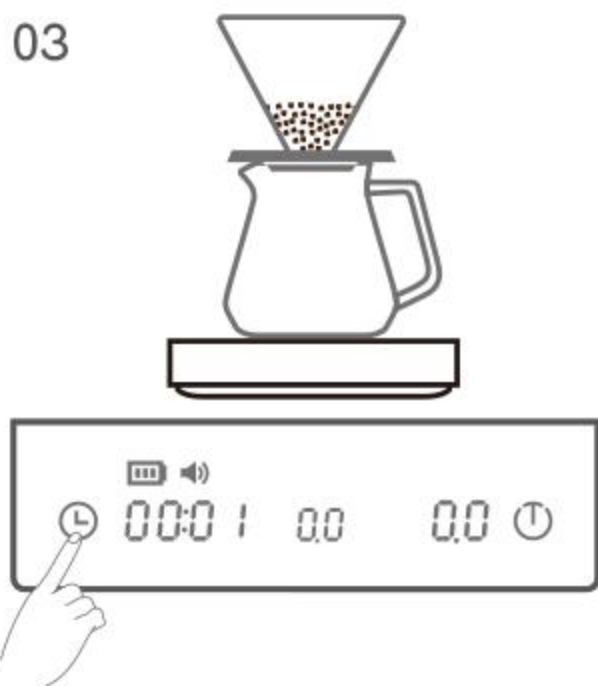

Put a brewer on the platform and saturate the paper filter. Turn it on and quick press to tare.

02

Put ground coffee with desired weight into the filter. Quick press the Tare button again.

03

Tare again and quick press the timer button. Now start to brew. The timer can help you control the timing of the bloom and pour.

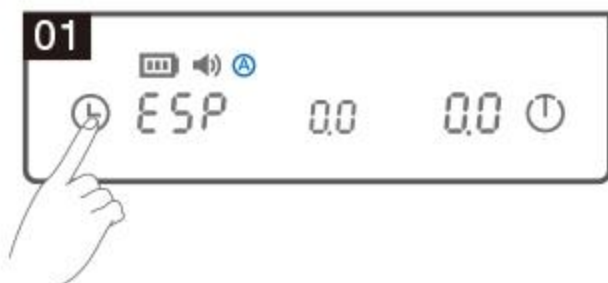

04

When brewing finishes, quick press the timer button to pause timing and the weighing panel will display your brewing data.

Espresso Mode

In Espresso mode, when the device enters a standby state and there is a weight change (more than 50g), it will automatically awaken to continue Espresso mode.

Quick press the timer button 5 times to start Espresso Mode. The timer zone will display ESP.

The Auto-brewing mode indicator A will flash slowly in 1 second.

When you put a cup on the platform, it will tare automatically. When the platform detects coffee droplets landing in the cup, timing will start automatically.

When brewing is over and the cup is removed, timing and weighing both stop automatically and the recorded values will flash. The values will then automatically clear and return to the initial state of displaying ESP and 0.0.

Pour-over timing Mode

The cycle Sequence will be Regular Mode, Espresso Mode and Pour-over timing Mode.

Quick press the timer button 5 times until an audible beep and the Pour-over Auto Timing Mode indicator lights up.

Place a brewer on the platform and add ground coffee. Then quick press the timer and wait for a 3-second countdown.

After the countdown is over, the weight value will auto-tare and you can start brewing. Timing starts as soon as the weight begins to change (the record is valid when more than 40s and more than 50g is recorded)

If the brewer is removed, the timer will stop and the brewing time will flash. At this time, if you put the brewer back and quick press the timer button, it will continue weighing and timing. Then you can quick press the timer button again to end recording. Long press the timer to enter standby mode.

NOTICE:

1. Adaptors with fast charging functions are prohibited. Adaptors of 5v, 1A-2A are recommended for charging.
2. Place the scale on a stable and vibration free surface at a horizontal location.
3. Do not use during charging.
4. If the device hasn't been used for too long, the battery may not get charged due to low power. Kindly charge it to a USB port on your computer with low-current charging method. When it gets aroused, then charge normally with an adaptor.
5. When Timer function is off, the scale will automatically shut down after idling for 3 mins. When Timer function is on, the scale will automatically shut down after idling for 15 mins.
6. The surface of the scale is waterproof. But DO NOT make liquid enter the gap between shells and charging port. Please do not soak it in water.
7. DO NOT attempt to open the unit to fix or repair it.
8. This product is covered by a One-Year Limited Warranty. Attempts to take apart of the unit will void the warranty
9. It is an accessory for coffee brewing. DO NOT use it for trade settlement and other occasions.
