

# JAVA 25 GRINDER NEW!

The JAVA Grinder has been an icon from the start. After receiving essential customer feedback, we took your requests and executed a slimmer, sleeker, hand coffee grinder. Key feature updates include a 2mm reduction in width for AeroPress Go compatibility, a threaded knob to ensure safe storage within the grind catch, increasing the grind catch size to ~30 grams and compatible with our all-new Nest Pour Over Kit. Allowing you to make the best cup of coffee regardless of where you are.

Awesome Product

"After a few deceiving attempts I have finally found the right tool to have a good coffee when I'm outside and or camping. Well-made, and sturdy, this one is built to last. A must-have companion!"

- Review by Jean-François T.

The perfect integrated adventure-brewing system, enabling you to brew the finest cup of pour over coffee. Anywhere and everywhere.

# THE NEST COLLECTION

## UPGRADED ESSENTIALS

**Designed in Canada, enjoyed around the world.** JAVA Grinder was an icon from the start. With feature upgrades reflected in the JAVA G25, to providing a double capacity grinder - JAVA G45, we firmly believe fresh ground coffee tastes better.

## SUSTAINABILITY

**Better for the environment and built for life.** The Nest Collection is not only comprised of 80% recycled stainless steel, it is also sold with a stainless steel mesh filter so you can feel good about your limited impact on the environment.

## POUR OVER BREWING

**Control. Consistency. Freshness.** The double-walled recycled stainless-steel dripper offers substantial insulating benefits. The conical shape and spiral ribs within the pour-over device create the ideal flow rate of water to coffee grinds.

# NEST POUR OVER KIT + NEW! JAVA G25 GRINDER
