Continuous
Power Plug-in
Wall & Battery
Backup

Digital LCD Display

Emergency LED Flashlight

Alarm & Flashing
Light Indicator

10-Year Life

ALWAYS ON ALERT

Carbon Monoxide (CO) gas is odorless, colorless and toxic. This is why you need a reliable CO gas detector to keep you safe in your home and office. The Blackout Buddy CO is ETL Certified to UL2034 CO standards. If dangerous conditions are detected, the Blackout Buddy CO will blast an audible and LED flashing alarm.... Even during a power outage!

CARBON MONOXIDE ALARM EMERGENCY LED FLASHLIGHT

ACTIVE CO SENSOR

Detects dangerous Carbon Monoxide (CO) Gas from common sources such as gas or wood burning fireplaces, leaking gas appliances, gas boilers and heaters -including portable, clogged chimney, running automobiles, and other CO omitting equipment.

PLUG IT IN AND FORGET IT

Just leave the Blackout Buddy CO in your wall socket and you'll never be in the dark. We suggest plugging it into a wall socket that is 5 to 10 feet away from a gas appliance, an area that is well ventilated and in a visual line of sight. Backup included replaceable AA batteries provides added security and continuous protection even when power is lost.

REAL TIME CO LEVEL

The Blackout Buddy CO has a large LCD showing you the current CO levels. Real-time CO level (ppm) provides vital information at all times.

ALWAYS READY FOR ACTION

When the power goes out, the Blackout Buddy CO continues to detect for CO. Always ready with two sources of power, either plugged into a standard 120V AC outlet or replaceable AA batteries. The CO detection continues, even during a power outage.

FEATURES

- Carbon Monoxide Alarm
- Alarm & Flashing Light Indicator
- Continuous Power (Plug-in Wall & Battery Backup)
- LCD Display
- Emergency LED Flashlight
- 10-Year Life
