

Grab N' Go Tote Adjustments

The single pattern Grab N' Go tote was originally published in the Fast & Furious Family book. The size of the tote was adjusted by a little bit when the pattern came out as a single pattern, shrinking the tote by 1" to be able to use 1 yard of fabric for lining.

Here are the adjustments you need to make on the cutting if you have the book, if you want to make the slightly smaller version.

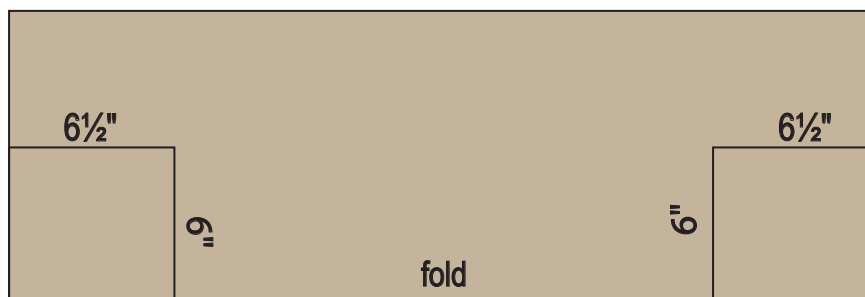

Cutting

Fabric A: Cut into a 35½" x 24½" rectangle.

Foam, CraftTex or Batting: Instead of 13-7/8" x 7" rectangles, cut Four 6½" x 14¾" rectangles. All other sizes are the same.

Assembly

Step 3: Adjust the cutout sizes to 6" x 6½" as shown.

Step 5: I used foam inside my handles.

Step 6: Position the handles 13" from each edge of the sewn unit.
