INSTRUCTIONS

1969 VINTAGE

INTRODUCTION

To name each model, we looked back in time to find important moments in the history of horology to acknowledge those milestones

1969 changed everything. It was the year the world's first Quartz watch was released - and this new type of movement changed the watch industry completely. This movement rewrote horologic history with its remarkable accuracy, smaller size, while at the same time making wristwatches affordable

Our first unisex collection is designed around such Quartz movement, together with vintage details in form of a slightly curved dial and a super-domed glass. Combining this with a "humble" dream of creating yet another historical impact, we named this timepiece 1969 Vintage
