

### STEP 1

Connect the audio cable, USB cable, and the ethernet cable to the POE Link.

### STEP 2

Mount the door bracket to the door frame with the provided screws. Place the POE Link in the area between the screw pegs, guiding the Ethernet cable through the outer hole on the door bracket. Then screw the interior bracket to the door bracket and pull the audio and USB cables through the hole.

### STEP 3

Mount the exterior bracket hooks to the interior bracket holes at the top of the brackets.

### STEP 4

Take the black micro USB cord, located in the exterior bracket, and connect it to the black POE Link.

### STEP 5

Plug the white USB and audio cable into the tablet. Tuck away the excess cords and place your tablet between the interior and exterior brackets.

### STEP 6

To finish, secure the exterior bracket to the interior bracket by placing the screws into the holes beneath the exterior bracket.
