VIDEOBAR VB-S

Meet your newest office all-star.

Say goodbye to “good enough” tech and say hello to the Videobar VB-S, an elegant, high-performance solution that sets you up for success.

The Videobar VB-S is a compact, all-in-one USB videoconferencing device that brings signature Bose Professional sound and quality to your office. With plug-and-play simplicity, it's quick and easy to set up and use—no more videoconferencing hardware headaches. Specially designed for small meeting spaces, the VB-S ensures voices on the call sound natural, while multimedia presentations and *Bluetooth*® audio are rich and engaging.

Compatible with Google Meet, Microsoft Teams, Zoom and more, bringing the Bose Professional experience to popular Unified Communications platforms

Advanced tech. Everyday reliability.

Signature Bose Professional audio featuring a beam-forming array of four microphones making conversation sound more natural by actively focusing on voices; exclusion zones that help reduce unwanted noise; and auto EQ delivering optimized audio to all participants

4K ultra-HD camera with 5x digital zoom and a wide field of view helps meeting participants connect visually more effectively

Two autoframing modes: Group Mode frames all in-room participants ensuring that no one is left out of the conversation. **Individual Mode** frames and dynamically follows a single participant

Elegant, sturdy, low-profile design made possible by renowned Bose Professional engineering, allows loudspeaker, microphones, and electronics to be housed closely together while delivering stunning performance without interference or sacrificing stability

Mount anywhere. Meet everywhere.

Simple mounting options included to facilitate tabletop or wall placement, with available display mounting kit (sold separately)

Remote control included for simple set-up and operation

Simple configuration and administration software so you can keep your day job.

Videobar Configuration for easy set-up, access to custom settings, and firmware updates

Videobar Administration to remotely manage single-device or multi-device changes, and to view device status

Videobar Mobile app for real-time VB-S control via smartphone; easily adjust volume, mute, pan, tilt, zoom, preset controls, and *Bluetooth*® pairing

VB-S comes with an extended 3-year warranty that delivers added protection and peace of mind.
