**INDICATION:** During the calendar jump phase between **10.30 pm and 00.00 am** the date can be changed. In this case the date of the following day needs to be set as there will be no jump at midnight.

**Stem position 1**

– Home position, watch runs

**Stem position 2**

– Quick change of the date (↻ clockwise), watch runs

– Quick change of the weekday / language (↺ anticlockwise), watch runs

Beyond the calendar jump phase the weekday or language can be changed without restrictions (quick change by crown – position 2).

Regularly around midnight the second language appears at first for approximately 2 hours before the original set language appears in a second weekday jump.

**Stem position 3**

– Hand-setting, watch stops

– when stem pulled out, save up to 70% energy
