## KEY FEATURES

WIRED/WIRELESS REMOTE

### Wireless Remote

Ergomotion remotes are modern and stylish devices available in either wired or wireless configurations.

HEAD / FOOT

### Head and Foot Articulation

Elevate the head or foot of the Ergomotion bed to reduce snoring and relieve joint pain.

WALL SAVER

### Wall Saver

As the bed articulates and raises your upper body, the Wall Saver feature glides back, keeping your nightstand within arms.

ZERO CLEARANCE

### Zero Clearance

Motors and linkages are positioned so they do not interfere with under-bed storage, bed slats or support.

ONE-TOUCH FLAT PRESET

### One Touch Flat Preset

With the press of a button, gravity brings the bed back to a flat position so you can climb in and out of bed with ease.

### 2 Programmable Presets

Use programmable presets to reach your favorite positions in seconds.

ZERO G

### Zero G

One touch button that raises the legs slightly above the heart to promote circulation and relieve pressure off the lower back, mimicking the posture astronauts assume during take-off.

MASSAGE MOTORS

### Massage

Two high-power, low-noise sonic massage motors help you unwind in the comfort of your home.

LIGHTS

### Lights

Soft LED lighting under your bed helps guide you through the dark safely.

VOICE ACTIVATED

### Voice Control

Compatible with most voice-activated or voice-controlled applications and technologies. Bluetooth dongle or Wand required.

USB CONVENIENCE

### Dual USB Ports

Provides the ultimate in convenience for USB devices. Charging or powering phones, tablets, or other devices is within easy reach.

HEAD TILT

### Head Tilt

For increased comfort, the section of the base under the head automatically tilts forward as the top portion of the base rises.

LUMBAR SUPPORT

### Lumbar Support

Lumbar support provides increased support for the lower back area.

3-IN-1 LEG

### 12" Stackable Legs

Provides multiple height options so the base can be set to a variety of heights, accommodating aesthetics or different levels of underbed storage.

## ERGOMOTION FEATURES

ZERO STANDBY

### Zero Standby Power System

The Ergomotion bed features energy efficient technology to help you cut your bills and your environmental footprint. When not in use, the Ergomotion bed consumes less than 1 watt of energy.

POWER OUTAGE PROTECTION

### Power Outage Protection

If electrical power is lost, the base can be brought to a flat position by pressing the button on the power down box under the base.

SILENT DRIVE MOTORS

### Silent Drive Motors

The reliable Ergomotion motors are designed for extremely quiet operation, so you won't be disturbed while lounging, reading, or sleeping.

GRAVITY RELEASE

### Gravity Release

Slow, controlled return to flat powered only by gravity. The Head and foot motors are designed to lower the mattress by reacting only with gravity, never pulling downwards, which minimizes pinch points.

## ACCESSORY OPTIONS

LEG OPTIONS

### Interchangeable Leg Options

A variation of styles are available, including 3-in-1 legs. The 3" + 6" leg heights can work separately or together for a height of up to 9 inches.

HEADBOARD BRACKETS

### Headboard Brackets

Connect your Ergomotion bed frame to your favorite headboard with our brackets for a cohesive and polished look to complement the rest of your bedroom's decor.
