

BALINEUM

SERIES 'S' HANDPAINTED TILES

Decorative terracotta tiles have adorned bathrooms across Europe for centuries. From the ports of Amalfi to the villages of Spain, artisan-painted tiles capture the essence of the Mediterranean. We celebrate the heritage of these seaports with the Series 'S' range of ceramic tiles, handpainted in Italy and available in the UK exclusively through Balineum.

Herein you'll find individual pages for each design in the collection. From classical to geometric, patterns are listed alphabetically by name and include decorative field tiles, borders and trims. Some field designs have matching borders whilst other borders sit on their own for you to mix with patterns or pair with plain wall tiles. We are happy to supply plain tiles in a range of complimentary colours, shapes and sizes upon request.

We are also pleased to introduce Listello tiles to the UK. These tiles were originally designed to go around doorways in the houses of Italy. We love that idea and they also work well as a trim atop square field tiles. You'll find the Listello designs at the end of this catalogue.

See something you like but wish it came in another colour, size or shape? Chances are we can do just that for you. Because this collection is handmade, the options are almost limitless. The colour chart on page 184 shows the range of glaze colours available

LEAD TIMES & PRICING

Phase I: Samples. We keep many loose tiles in our office to loan clients. If required, we can create specific colour control sample. This will take 6-8 weeks. Upon your approval, we'll use these control samples to create your final order.

Phase II: Production orders take 10-12 weeks for under 15sqm. For larger quantities, lead times are quoted per project. Prices vary depending on the tile size and design. Get in touch for our price list or a custom quote. Most designs available as standard in 13cm, 15cm and 20cm square tiles. Enquire for pricing to apply designs to other tile formats. Custom designs using our tile formats and colour chart are also possible.
