

KREWE

EYEWEAR

KREWE

A NEW ORLEANS-BASED AND CULTURALLY INSPIRED INDEPENDENT EYEWEAR COMPANY THAT CELEBRATES INDIVIDUAL STYLE THROUGH MODERN, ICONIC FRAMES.

FOUNDER'S STORY

KREWE was founded in 2013 by Stirling Barrett, a New Orleans native and creative entrepreneur. His vision of the city as a thriving cultural hub was his inspiration for launching KREWE. Our team passionately believes in spreading the culture of New Orleans and its celebration of individual style, one frame at a time.

DESIGN & QUALITY

Stirling Barrett designs all KREWE eyewear in our New Orleans creative studio. Our goal at KREWE is to produce a well-designed, quality product. We continue to seek the highest quality materials by partnering with independent, small batch suppliers from around the world. Final inspection and packaging takes place in New Orleans—a process culminating in a truly global, handcrafted product. Our thoughtful approach to design and handmade production allows us to confidently provide a lifetime warranty on every pair we sell.

HANDMADE

Not all plastic is created equal—our frames are hand carved out of sheets of extremely lightweight acetate, which is a plant-derived material. The pliable nature of acetate ensures that the frames are much less likely to break than common mold-injected frames, and also allows them to be tailored to your face for a customized fit that lasts. Heat sensitive acetate means that the frames will mold to your face over time—a little tightness at first is to be expected.

WARRANTY

KREWE shades are built to last. A 100-point inspection system is used when assembling each pair. We stand behind the quality of our product with a limited lifetime warranty.

BRANDING

People represent our brand. That's why we use discreet KREWE insignias so you and your frames stand out.

INSPIRATION

Each frame is named after or inspired by notable New Orleans sites or cultural references—all evoking the spirit and essence of our city. For example, St. Louis, one of our top-selling frames with a unique architectural metal bridge, is named after St. Louis Street, which runs through the French Quarter and is known for its buildings' intricate wrought iron balconies and gates.

ALL PRICES ARE CHARGED IN USD
AT AN EXCHANGE RATE OF 1.1
