## **IMPORTANT SAFETY NOTICE**

---

READ AND SAVE THESE INSTRUCTIONS

### **WARNING**

TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT USE THIS FAN WITH ANY SOLID-STATE CONTROL DEVICE.

### **WARNING**

TO REDUCE THE RISK OF FIRE, ELECTRIC SHOCK, OR INJURY TO PERSONS, OBSERVE THE FOLLOWING:

- a) Use this unit only in the manner intended by the manufacturer, if you have questions, contact the manufacturer.
- b) Before servicing or cleaning unit, switch power off at service panel and lock the service disconnecting means to prevent power from being switched on accidentally. When the service disconnecting means cannot be locked, securely fasten a prominent warning device, such as a tag, to the service panel.

### **CAUTION**

For General Ventilating Use Only. Do Not Use To Exhaust Hazardous Or Explosive Materials And Vapors.

### **WARNING -**

TO REDUCE THE RISK OF A RANGE TOP GREASE FIRE:

- a) Never leave surface units unattended at high settings. Boil overs cause smoking and greasy spillovers that may ignite. Heat oils slowly on low or medium settings.
- b) Always turn hood ON when cooking at high heat or when flaming food.(i.e.Cherries Jubilee, Peppercom Beef Flambe').
- c) Clean ventilating fans frequently. Grease should not be allowed to accumulate on fan or filter.
- d) Use proper pan size. Always use cookware appropriate for the size of the surface element.
- e) Keep fan, fillters and grease laden surfaces clean.
- f) Use high setting on hood only when necessary.
- g) Don't leave hood unattended when cooking.
- h) Always use cookware and utensils appropriate for the type of and amount of food being prepared.

### **WARNING -**

TO REDUCE THE RISK OF INJURY TO PERSONS IN THE EVENT OF A RANGE TOP FIRE, OBSERVE THE FOLLOWING:

- a) SMOTHER FLAMES with a close-fitting lid, cookie sheet, or metal tray, then turn off the burner. BE CAREFUL TO PREVENT BURNS. If the flames do not go out immediately, EVACUATE AND CALL THE FIRE DEPARTMENT.
- b) NEVER PICK UP A FLAMING PAN – You may be burned.
- c) DO NOT USE WATER, including wet dishcloths or towels – a violent steam explosion will result.
- d) Use an extinguisher ONLY if:
  - 1) You know you have a Class ABC extinguisher, and you already know how to operate it.
  - 2) The fire is small and contained in the area where it started.
  - 3) The fire department is being called.
  - 4) You can fight the fire with your back to an exit

### **WARNING -**

TO REDUCE THE RISK OF FIRE, ELECTRIC SHOCK OR INJURY TO PERSONS, OBSERVE THE FOLLOWING:

## IMPORTANT SAFETY NOTICE

---

- a) Installation work and electrical wiring must be done by qualified person(s) in accordance with all applicable codes and standards. Including fire-rated construction.
- b) Sufficient air is needed for power combustion and exhausting of gases through the flue (chimney) of fuel burning equipment to prevent back-drafting. Follow the heating equipment manufacturer's guideline and safety standards such as those published by the National Fire Protection Association (NFPA) and the American Society for Heating, Refrigeration and Air Conditioning Engineers (ASHRAE) and the local code authorities.
- c) When cutting or drilling into wall or ceiling, do not damage electrical wiring and other hidden utilities.
- d) Ducted fans must always vent to the outdoors.
- e) NEVER place a switch where it can be reached from a tub or shower.
- f) Make sure the power is off before installing, wiring or maintenancing.

### **WARNING**

TO REDUCE THE RISK OF FIRE, USE ONLY METAL DUCTWORK.

### **CAUTION**

To reduce risk of fire and to properly exhaust air outside - Do not vent exhaust air into spaces within walls, ceilings, attics, crawl spaces or garages.

### **OPERATION**

Always leave safety grilles and filters in place. Without these components, operating blowers could catch onto hair, fingers and loose clothing.

The manufacturer declines all responsibility in the event of failure to observe the instructions given here for installation, maintenance and suitable use of the product. The manufacturer further declines all responsibility for injury due to negligence and the warranty of the unit automatically expires due to improper maintenance.

### III. Installation Guidelines

#### 1. Surrounding Environment (Fig.1)

Check the surrounding of range hood. If there are too many windows or doors nearby, it is advisable to close the windows and doors before turning on the range hood to prevent the external convection and affecting the ventilation. The smoke has to rise up to 10 inches from the stove/grate to be within the range of venting efficiency.

Fig. 1  
Too many windows, too much convection

#### 2. Installation Heights (Fig.2)

The ideal installation height is a distance of 24 to 30 inches from the bottom of the range hood to the surface of the stove top.

Fig. 2

#### 3. Hood installed in parallel and horizontal level (Fig.3)

The front, back, right and left of hood must be in parallel and horizontal level, to avoid the oil in the oil tub from spilling over. To ensure that the hood is leveled when installing, it can be measured by the hook mark for the left and right side; and the screws fixed securely onto the wall to ensure the front and back of the hood are parallel.

Fig. 3

#### 4. Exhaust duct

In order to increase the venting efficiency of the hood, it is recommended to use the 7 inch duct to maintain the best air flow efficiency; the length of duct must also be as minimal as possible.

#### 5. Electrical arrangement

Please do not plug the range hood to the circuit breaker with other high electricity consumption appliances.

※ Before installing the hood, please apply fast drying glue to the collar and securely attach it to the top of the range hood's vent lid. Install the range hood and attach pipe to the plastic collar and seal with aluminum tape and prevent steam and smoke leakage.

### 三. 安裝原則

#### 1. 周圍環境(圖一):

抽油煙機安裝位置，如在窗上或附近有太多門窗，請在開動抽油煙機前，先關閉門窗，以免空氣對流大而影響吸力，因當油煙上昇未至10吋之有效吸力範圍，則無法充分發揮抽油煙機最佳效果。

(圖一)

門窗太多、對流太大

#### 2. 安裝高度(圖二):

安裝高度自本機底板至煮食爐面之距離以24~30吋為最理想。

(圖二)

#### 3. 機體應保持水平(圖三):

機體應保持前、後、左、右水平，以免氣流箱，導油盆積油而溢出。

左、右水平可由掛碼調整，前、後水平則由鋼丁螺絲鎖緊牆壁，以固定標準。

(圖三)

#### 4. 排風管:

為增加吸力效能，請配合使用本機出風管接頭之直徑7吋排風管，排風管長度應以適合長度最佳，不宜過長。

#### 5. 插座安排:

請勿與烤箱或冰箱等耗電量較高之電器產品共用一個插座。

※ 安裝前先以矽利康注入風管圈後將風管嵌入，再用封膠封住風管圈。

#### 四. 安裝步驟-SC8130S/W & SC8136S/W

櫥櫃安裝說明:(如圖一)

1. 請準備安裝位置及空間。
2. 測量出風口及電源線孔的大小，然後再鑽孔。
3. 櫥櫃需加強本機固定的地方，建議使用木條強化在櫥櫃內底部。
4. 請用十字螺絲起子移除油機底板，卸下油機底板及燈泡電線。
5. 依安裝位置設置四支木螺釘。
6. 安裝時用木螺釘扣上之後，將油機與櫥櫃用螺絲鎖緊，讓油機與櫥櫃安全不會掉落。
7. 裝設電源。
8. 安裝風管並用風管膠帶密封。
9. 檢查風管處是否緊密及其他功能是否正常。
10. 將油機底板與燈泡重新安裝上去。
11. 將油杯與出風口安全網裝進油機。

#### IV. Installation Procedures-SC8130S/W & SC8136S/W

Hood is designed for installation under a kitchen cabinet.  
See Fig.1 for details.

1. Prepare duct location on hood .
2. Measure and cut out duct and electrical openings in cabinet or wall to match up with the hood. Make sure duct opening is large enough to apply aluminum duct tape.
3. Reinforce cabinet bottom with wood strips if additional strengthening is required or if cabinets are framed.
4. Remove bottom panel from hood using a Philips screwdriver to remove each of the screws. Also remove lighting harness by pressing in on the clip to release the lights from the internal wiring.
5. Use 4 wooden screws to secure the hood to the bottom of the cabinet.
6. Lift hood onto screws located on cabinet bottom and lock into place. Make sure all(4) key-holes cover the screws. Tighten each screw to secure hood to cabinet.
7. Install electrical.

Fig 1

8. Install ductwork and seal with aluminum duct tape.
9. Power up hood and check for leaks around duct tape and test all functions.
10. Reinstall bottom panel and reconnect lighting harness.
11. Slide oil cups into their openings on the bottom of the hood. Install protection grilles over each blower opening and secure with the pre-installed screw.
