

CHILL DIAMOND FAST™ is an optical quality, very low viscosity transparent epoxy resin for small pour and thin layers.

You can also use it to fill in very small cracks, voids or knots in the wood. It can be used to seal the wood or to apply as a finish coating on small surfaces. It can also be used to create jewelry pieces. Perfectly compatible with various artists additives, CHILL DIAMOND FAST lets your talent take over and produce unique creations of exceptional quality.

PRICING	
1.5L Kit	\$89.00
3L Kit	\$162.00

CHILL 3D™

CHILL $3D^{\text{TM}}$ is a transparent epoxy resin with excellent UV resistance. Perfect for creating "dome" effects. The thickest resin in our line of clear resins. Highly compatible with pigments and metallic powders.

CHILL 3D™ protects your photos, documents, pots small handcrafted parts, and gives depth and brilliance to art pieces such as paint on canvas, wood, ceramic, and more.

PRICING	
2L Kit	\$143.00
8L Kit	\$359.00

CHILL CLEAR™

A transparent, optical quality, self-levelling epoxy resin with excellent UV resistance. This very low viscosity system can be cast to a maximum thickness of 1/2 inch.

Ideal for an artist's canvas, creating handcrafted objects, protecting bars and wood tabletops, potting LED lights, and for small electrical and electronic components.

Ideal to fill CNC letters, logos, signs or fill deeper cracks, voids and knots. Can be poured up to 0.5 inch thick!

PRICING	
1.5L Kit	\$89.00
3L Kit	\$162.00
12L Kit	\$417.00
30L Kit	\$929.00

CHILL DEEP POUR™

CHILL DEEP POUR[™] is a very low viscosity epoxy with very high ultraviolet resistance. The CHILL DEEP POUR[™] makes it possible to cast bigger river tables from 60-100L liters, up to 2.25 inch thick, in a single cating, while maintaining its transparency and high precision.

Its long pot life 1800 mins at 22°C/72°F makes it possible to mix several liters at a time and pour larger quantity of resin during the production of the river table without overheating or the need to use a fan or cooling system.

PRICING	
30L Kit	\$1,058.00
60L Kit	\$1,908.00

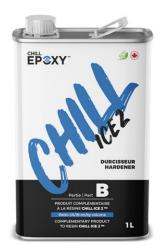

CHILL ICE 1™

A low viscosity, optical quality, transparent epoxy resin. Ideal to fill deeper and larger cracks with resin (max 1.25 inch thick), build small/medium projects or river tables up to 1.25 inch thick.

CHILL ICE 1^{TM} is perfect for bubble-free casting after less than 5 to 10 minutes without the use of a torch, which can cause an exothermic imbalance in the casting.

PRICING	
1.5L Kit	\$96.00
3L Kit	\$184.00
12L Kit	\$417.00
30L Kit	\$929.00
60L Kit	\$1,673.00

CHILL ICE 2™

A low viscosity, optical quality, transparent epoxy resin. Ideal for casting epoxy rivers into wood tables. The CHILL ICE 2^{TM} is perfect for bubble free casting after less than 5 to 10 minutes without the use of a torch which can cause an exothermic imbalance in the casting.

With its very low viscosity, CHILL ICE $2^{\text{\tiny TM}}$ penetrates into wood fibres, creating a strong structural bond at the short, medium, and long term.

PRICING	
3L Kit	\$184.00
12L Kit	\$428.00
30L Kit	\$967.00
60L Kit	\$1,750.00

P-TEC 8400™ is especially formulated for lamellated wood panels, table tops, wood furniture components, tables slides, etc..

This polyurethane-based paste is indicated to repair fissures, microfissures, knots and all defects on the surface of solid wooden panels and components.

Available in 3 basic colors : beige, cognac, black

PRICING	
Pouch-Kit (250g) - Black, Cognac, Beige	\$45.00
Bi-Component Cartridge (400ml)	\$100.00

CHILL DROPS™

TRANSPARENT or OPAQUE are highly concentrated colour pigments.

Completely compatible with all the products of our CHILL EPOXY line. Strong colours will be achieved by using gradually between 0.0250% up to 5% in weight/volume in the mixture A/B until you reach the desired colour.

Colors available: white, light blue, dark blue, light grey, yellow, black, orange, red, green, violet, pink

PRIC	CING
Opaque (28g/4oz)	\$46.00
Transparent (28g/4oz)	\$39.00

Compared to natural mica, synthetic mica offers:

- 1. Less impurities
- 2. Better consistency when mixing with our epoxy
- 3. Less heavy
- 4. Better resistance to temperature
- 5. Better effects
- 6. Less bleed from metallic colors

PRICING	
1oz	\$19.00
3oz	\$38.00
