

BUILD YOUR CRITICAL CYCLE

FIXED GEAR

Flip-Flop Hub

1 – Loosen the bolt on the rear tire facing beyond the bike to the back.

2 – Loosen and remove the bolts and washers on both sides of the tire.

3 – Pull the tire towards the frame of the bike and slip the chain off of the cog.

4 – Wiggle the tire out, remove the chain from the tire completely, and take the tire out of the frame.

5 – Flip the tire around and place it back into the frame.

6 – Replace the chain on the cogs.

7 – Replace the metal bracket that was facing beyond the bike.

8 – Replace the washers and bolts on both sides of the tire and beginning tightening, alternating between sides to ensure evenness.

9 – Pull the tire back slightly so the chain is taut.

10 – Tighten the bolt against the bracket facing behind the bike.
