

# Working alone creates unique risks to the health and safety of your workers. You must take all reasonable steps to reduce these risks and take into account that many activities are riskier if carried out alone.

Your health and safety obligations to workers who work alone are the same as for any worker – you must take all reasonably practicable steps to eliminate or reduce the risks to their health and safety. However, those who work alone can be at greater risk and therefore require a higher level of diligence to keep them safe.

This eBook will outline the common health and safety risks to workers who are working alone, and what you need to do to reduce them.

You will learn how to:

- identify the hazards to workers who work alone;
- assess the risks that may result from the hazards you have identified;
- determine what control measures to introduce to reduce those risks; and
- implement effective control measures such as a working alone policy.

## YOUR EXPERT

**MICHAEL SELINGER** LLB, BA (Hons) (ANU)  
*Partner, Holding Redlich Lawyers*

Michael Selinger is Partner in the Sydney office of Holding Redlich. He practises in all areas of workplace relations with a special focus on occupational health and safety. He has extensive litigation experience in employment disputes and defending health and safety prosecutions. Michael is also a regular presenter of seminars and training on workplace issues.
