## I Enable Parents to Help their Children Learn Faster with Cognitive Science

### Bio

As a child, Bridget saw bullies mock other kids for their learning difficulties, and she felt God call her to help kids who struggled. Since 1987, she has answered His call as a classroom teacher, special educator, reading clinic director, speaker, consultant, and assessor. Bridget also draws from her experiences as a homeschooling mom who worked her daughter out of dyslexia. She co-founded the online learning center WowzaBrain.com in 2008. Via cognitive-educational games and Bridget's mentoring assistance, WowzaBrain equips parents to help their children make rapid, life-changing, academic gains. Helping parents and their children achieve success is Bridget's joy.

### Workshop Titles

- *Speed Up Your Turtle: Two Simple Ways to Increase Processing Speed*
- *Build Comprehension: Three Brain-Smart Ways to Increase Understanding*
- *"Huh?" Fun Techniques to Improve Working Memory So Your Child Can Learn*
- *Study Smarter, Not Harder: Work with God's Design to Build Memory*
- *Study Smarter, Not Harder: The Nuts and Bolts of Studying*

### Skills

Bridget captures her audience quickly by modeling ways to engage children and making cognitive concepts user-friendly. She teaches a range of techniques like "n-back" to build working memory and how to use apps like "Stroop Effect" to build processing speed. Parents leave with plenty of ideas, techniques, and games that they can use the next day.

Bridget also offers literacy screenings for your function to inform concerned parents about their children's reading and learning abilities. The screenings indicate strengths, areas for growth, and grade-level reading performance. Donated proceeds can support the ministry of your choice.

### Testimonials

- "THIS is what I needed. I'd almost given up hope for my son. I can't wait to get home and try this stuff—especially the metronome and the 'deliberate practice' technique. I'm so encouraged, and I feel empowered!" *Erin Johnson*
- "Thank you for *showing* me rather than telling me how to work with my child. I especially love the 'backblasting' technique. It's so simple, yet I can see how it would be key to quickly growing a child's reading skills." *Brenda Burge*
- "This was by far the best workshop I attended. Not only did I learn some really great techniques, I feel affirmed in my role, and I have a much better understanding of what good teaching is. I want to be a 'brain-friendly' teacher." *Laura Warnes*
