mom	noodle	jam	pole	chair

Wowza Tips™

This game builds an essential cognitive skill called “working memory,” which helps your child hold onto information long enough to use it. Working memory also impacts your child’s ability to pay attention. All learning requires a strong working memory. Be sure your child is working to their full potential on this skill so that they can learn as easily as possible.

Set your metronome to 40 bpm. You won’t ever need to change it. This game is unique in many ways. Be sure to watch the video demo.

Items in Memory	2	3	4	5	6	7
Child’s Age (Years)	4-6	7-8	9-10	11-13	14-15	16-17

In *You Must Remember This*, adding an item to memory is like going up two grade levels. Be patient. It takes a lot of practice to grow your child’s working memory capacity. If you exhaust this list and want to continue working, simply enter “list of nouns” into your internet search engine to extend this game.
