## Numeration

## Skill Set 10-5 (Numerals 1,001-9,999) <br> Instructor Sheet

The student says the name of the numeral. If it is incorrect, the tutor says the correct name of the numeral and has the student touch it and say the correct numeral name. If the student cannot say the numeral correctly, the instructor should help. The digital countdown timer does not stop for the time it takes to correct an error.
