ABOUT US

At DiamondCore® Tools, we've been on a mission to change the world of ceramic arts since 1996. We create innovative, high-quality, hand-crafted tools that are essential for anyone working with ceramics, glass, tile, stone, wax and other materials.

Our products include:

- Carving tools
- Diamond stylus tools
- Trimming tools
- Handheld clay extruders
- Diamond grinding and sanding tools
- Sticky bats and pads
- The CINK mobile clay water recycling system
- And more!

Our high-performance tools let artists do things they never could have imagined before – faster and easier. Our blades are thinner, sharper and more durable than others on the market, giving you crisper lines, more intricate designs, less fatigue and better overall results. From the original P1 Carving Tool to the Bird of Paradise Pottery Multi-Tool, our products help customers take their projects to the next level.

Pottery Multi-Tool and Folding-Blade Tools

DiamondCore® Tools changes the world of ceramic arts again with our one-of-a-kind Bird of Paradise Pottery Multi-Tool and sleek, folding-blade tools.

The Bird of Paradise Pottery Multi-Tool is expertly designed to boost your productivity. It features a stainless-steel Pottery Knife, Needle Tool, Scoring Tool, Precision Blade, Cutting Guide, Mini-Wrench and #1 Phillips Screwdriver all in a stylish hardwood and steel handle. Use it to help join pieces of clay, cut edges at a precise distance or angle, tighten the hardware on your existing DiamondCore® tools and more.

Single, folding-blade versions of the Pottery Knife, Needle Tool, Scoring Tool and Mini-Wrench Screwdriver are also available, all built with hardwood and stainless-steel components.

Practical and economical, these tools also feature replaceable blades and inserts should you bend or otherwise damage them.

CARVING TOOLS/K Handle

Diamond Stylus Tools

To create the finest sgraffito detailing, you need DiamondCore® diamond stylus tools. These durable, pencil-like sgraffito tools have diamond stylus tips on both ends, providing a variety of intricate etching and detailing options for your bone dry works of art.

Each L series diamond stylus tool comes with two unique tips, two colored foam grips and a hardwood handle.

I love this stylus (L3 Diamond Sgraffito Stylus Tool - Small Football/Large Football). It is easy to use, very easy to master, and built to last. When creating sgraffito, it is my go-to.

Trimming Tools

Ready to refine your form or shape your bottom? Reach for Diamond-Core® trimming tools with replaceable, never-dull, stainless-steel blades. These trimming tools can handle clay too wet or too dry for other tools and provide minimal drag.

My first DiamondCore trimming tool! I love it! I have trimmed 30 items with it. It is sharp, easy to use, trim my pots and bowls super smooth. I love that one side is square and one side is rounded because I can switch it around and use each side depending on what I am doing. And it comes with an extra blade! Very good tool for the value!

Handheld Clay Extruders

R Series Handheld Clay Extruders quickly create clean and beautiful accents for your ceramic pieces. Use the tool's variable depth ski and DiamondCore® Tools advanced blade technology to produce feet for slab-built platters, dishes or plates, as well as handles for mugs, pitchers and other vessels.

Use on clay slabs that are the same dryness as you would use to pull a handle. If too wet, the extrusion may stick on the slab.

Loosen the thumb screw and adjust the depth ski up or down to the desired thickness and then re-tighten the thumb screw.

Truly sticky!

Sticky Products

Get a grip. Our sticky products are perfect for trimming dinnerware and low-profile pieces. The sticky bat firmly grips greenware for easy and efficient trimming.

The sticky bat is my favorite new tool! I wish I had it years ago. The surface is almost gummy feeling & my pieces stay put extremely well without lugs of clay hold them down like I was using before. I've even used a trimming chuck on it & it worked well. It saves me a lot of time being able to just center the piece & trim!

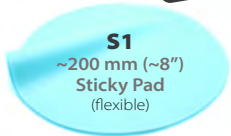

— Jessica

Works really well with the sticky bats! If you're already getting a sticky bat, definitely pick one of these up too. This trimming spinner makes "side" trimming easier, and I have fewer pots fly off the wheel when trimming.

— Charissa N.

The CINK

Say goodbye to the headache of clogged drains, and say hello to DiamondCore® Tools The CINK. This stand-alone, mobile clay water recycling system keeps clay out of drains in any studio, classroom or home.

The CINK:

- Collects clay and recirculates water – with no mess!
- Four-stage clay filtration down to 1 micron
- Reusable string filter and bag filter
- On/off pump with adjustable spray nozzle
- Multidirectional wheels with locking casters
- Restaurant-quality stainless steel
- Self-contained; not connected to a water or plumbing system
- Preassembled; unpack, check connections and add water

I love my CINK. I live in Cali and being in a constant state of drought being able to reuse water so easily is really great. I also did not have a sink deep enough and equipped with a shower head so in terms of cleanup and work surface it is very practical. I love the team at DiamondCore, great customer experience.

— Ariane P.J.

Wood and Metal Ribs

DiamondCore® Tools is always adding items you can't live without to our extensive line of products. Our wood and metal ribs are tools you'll reach for again and again!

These beautifully stained wood ribs come in three sizes but serve one purpose: to give your ceramics a smooth shape. A layer of wax oil protects these ribs as you use them with water while throwing. Though they'll easily glide over clay, these ribs won't slip from your hands. Engraving on the front and back provides a tactile surface that's easier to grip. Choose from large, medium or small for the rib that's just right for your piece.

Each of our flexible, stainless-steel ribs is simple yet elegant. The unique Arc Carving Metal Rib is the stencil you never knew you needed to replicate curved lines all across your work. The Large Metal Rib smooths, scores and helps cut clay cleanly with convenient measurement notches. Last but not least, the Small Metal Rib scores, smooths and features varied centering holes on its corners.

Additional Products

DiamondCore® Tools prides itself on an extensive line of innovative products, but we're not stopping there. Our research and development team is constantly in the lab, designing new, cutting-edge tools for a worldwide community of artists.

Our diamond grit products and carving tools are our cornerstones, but we're excited to carve out new markets. Visit [DiamondCoreTools.com](https://www.DiamondCoreTools.com) online to discover additional products you'll absolutely love.

You wouldn't believe how handy these little brushes are. Super easy to use and definitely the tool you needed that you didn't think you needed.

— **Bonny K.**

Stop hesitating! Click "purchase" now! Five minutes after I opened this bargain box I ordered another one. It's an amazing value! I received three different carving tools and two sanding blocks. And, let's remember that DiamondCore tools are the best around ... buy it. BUY IT!

FB14
355 mm (~14")
Foam Trim Bat

~~\$12~~

FOAM 14Y
355 mm (~14") Diameter
Foam Circle, 1" Deep

SAFETY PRECAUTIONS

DiamondCore® Tools are intended to be used by artisans who craft with mediums such as clay, stone, glass and more. All safety precautions should be followed at all times.

Common Sense

For all other items not listed here but available for purchase by DiamondCore® Tools, use common sense and best practices as you would with any small tool. Please see website for additional details and information: www.diamondcoretools.com.

Diamond Sanding & Grinding

Use with water. Wear safety glasses or goggles (or a face shield with safety glasses or goggles) and a dust mask, as small particles may become dislodged and fly in the air. Do not operate with gloves, loose clothing, long exposed hair or jewelry.

Carving, Trimming and Handheld Extruders

Wear safety glasses or goggles (or a face shield with safety glasses or goggles) as small particles may become dislodged and fly in the air. Always use protective eyewear when changing blades. Use protective gloves as needed and warranted by the work being performed.

Diamond Stylus Tools

Use with water. Wear safety glasses or goggles (or a face shield with safety glasses or goggles) as small particles may become dislodged and fly in the air. Tips are not replaceable once broken or used down to the nub.

Rotary Tools

Use with water. Wear safety glasses or goggles (or a face shield with safety glasses or goggles) and a dust mask, as small particles may become dislodged and fly in the air. Never hold a small workpiece in one hand and the tool in the other hand while in use. Clamping a small workpiece allows you to use your hand(s) to control the tool. Never lay the power tool down until the accessory has come to a full stop.

The CINK

Please refer to The CINK manual for a full description of the unit's safety precautions. Reminder: The CINK is designed to rinse equipment, capture clay and recirculate water. It does NOT generate potable water. For additional guidance, call DiamondCore® Tools at 619-905-9400 or email info@diamondcoretools.com.

Water

Always use diamond sanding, grinding and rotary tools with water.

Children

Keep tools out of the reach of children at all times.

Hole Drills

Use with water and cordless drills. Never mix water and electric tools that require a plug into a socket.

Pottery Multi-Tool and Folding Blades

Wear safety glasses or goggles (or a face shield with safety glasses or goggles), as small particles may become dislodged and fly in the air. Blades on the Pottery Multi-Tool and Pottery Knife and tips on the Needle Tool and Scoring Tool are extremely sharp. Keep Pottery Multi-Tool and single Folding Blade Tools closed when not in use. Always use protective eyewear when replacing blades.
