# 1.0 Quick Start Guide

Rechargeable Party Pump Tap. Here's what you need to know to get you started. For more info download our complete manual or watch our videos.

Attach Spout and Line. Twist and push the spout so that it sits up against the Party Pump unit, cut liquid line to height of keg and push onto internal liquid post.

Clean. Fill Mini Keg with no-rinse sanitiser and press pour button on top of tap system to clean before serving drinks.
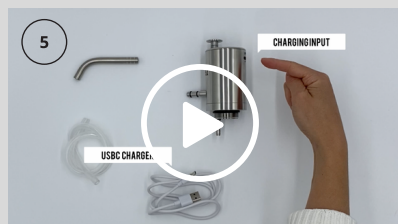

Soap will ruin beer head.

Fill Keg. The party pump is compatible with all iKegger mini kegs. Fill the vessel with the beverage of your choice, ensuring it's cold if you are wanting to dispense immediately.

Never serve hot/boiling drinks.

Screw Tap. Feed liquid line into mouth of mini keg and screw Party Pump tap into the mini keg. Now you can push button on top to serve your first drink.

Enjoy!

Charging. Red light will display showing that tap needs charging. Insert USB connection into a suitable plug, and the USB-C input into the Party Pump.

You can use tap while it is charging.

Storage. Tap will not keep drinks carbonated or sealed. If there is still liquid left replace tap with mini keg cap to keep in fridge.

Drink Suggestions.
- Beer for a Party
- Wine Spritzer
- Cocktails (Negroni, Margarita)
- Water
- Lemonade
- Refreshing drink after sports game - kids soccer, summer tennis
