

Operating Instruction

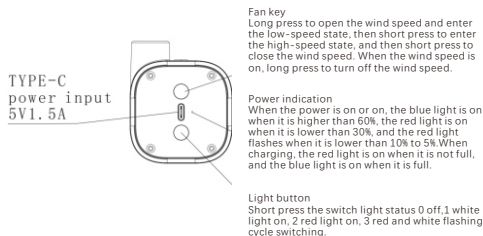

Multi-function dust blowing device

Please read the instructions carefully before using the product.

Product specification parameters

Working voltage	3.7V
Working current	3A-8A
Charging voltage / current	5V/1.5A
Maximum output	50W
Noise test	83dB distance of 100cm radial test)
Test loop	400 Vacation times
Work environment	-20°C to +80°C
Storage environment	-40°C to +80°C
Continuous working time	Low speed for 30 minutes, high speed 15 minutes

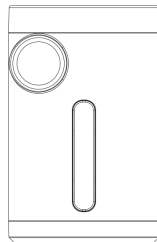

Operation manual

- 1、Fan button: long press to open the fan to enter the low speed state, then short press to switch high and low gear, long press to close the fan.
- 2、Key light: 1 often bright, 2 slow flash, 3 flash, 4 off, cycle switch.
- 3、LED :the red light flashes when the power is too low, the red light flashes when charging, and the red light is full.
- 4、Charging mode: Type-C charging port.
