INSTRUCTIONS

The marled effect is achieved by starting with two strands of Colour A, then you will drop one strand of A and replace it with one strand of B. As you are running out of A, two strands of Colour B, and then B and C and so on. There is no striping with this technique and marling creates a softer transition. You can change your colours at will in blocks that you find visually pleasing or as you are running out of your minis. Marling creates soft transitions and cool new colour combinations that might surprise you!

Try laying out your Minis out first and find a combination that you love. And take a photo of it just in case! The colours shown are all part of Hedgehog Fibres 2023 Advent Calendar.

Care Notes

Whether you are using commercially dyed yarn or lovely hand-dyed skeins, please keep in mind that colours might bleed. None of the examples shown bled, but I always knit up a sample and wash it as you would your finished item to be sure. Please use common sense - reds and crazy pinks tend to bleed the most, any red/white combo is probably not a good idea (we separate laundry, right?). To minimise bleeding, gently soak the swatch/finished item in cold water with a mild detergent or wool wash. The gentler you wash your project the better it will look over time.
