INSTRUCTIONS

How To Gradient Yarns:

I worked with two total strands of sock yarn held together. When I was ready to start changing colours, I removed one strand and replaced it with one lighter strand of yarn. I chose three colours with similar tonal qualities and shaded from darkest to light, so be sure to include one dark, one medium and one lighter colourway for it to be a successful gradient.

Colour A is your dark colour, Colour B should be your medium tone and Colour C should be the lightest of colours. Work two strands of Colour A together, replace one strand of A with one strand of B and repeat.
