STEP THREE: Measure Your Space

TILE SQUARE FOOTAGE CALCULATOR

Measure the width and height of every area, labeling each area with a letter.

Multiply the width and height to find the total area in inches, then divide by 144 to find the amount of square feet needed for the area.

Be sure to measure every area that needs tile and add them together!

<table>
<thead>
<tr>
<th></th>
<th>Width ___ in. x Height ___ in. = ___ /144 = ___ sq. ft.</th>
</tr>
</thead>
<tbody>
<tr>
<td>AREA A</td>

</table>

Example

Total AREA = ____ sq. ft.

Overage (10%) *20% for Moroccan Fish Scales

TOTAL TILE NEEDED = ____ sq. ft.
STEP FOUR: Talk to a Designer

LET’S COLLABORATE

We have a team of personable, skilled designers ready to talk with you about your specific project!

Whether you know exactly what you want and just need help placing your tile order, or if you want to start from the beginning, we can walk with you through the process. Call, email or visit our website to request a free quote!

WE’RE PERSONABLE

As a small team of artisans from the Midwest, we’re very easy to talk to! We work right from our studio where all of our tile is made by hand, so we’re very in-tune with every step of the process.
## STEP FIVE: Make A Plan
