

TECLA TABLE ASSEMBLY

YOU'RE GOING TO NEED A 4MM ALLEN KEY, A PHILLIPS HEAD SCREW DRIVER AND A FLAT LEVEL SURFACE

1. Grab everything out of the box and figure out which bit is which. These instructions work for both the Single & Double Tecla Table the Table Top just differs in width.

2. Take the Left End and screw the Bottom Support, the Top Support and the Right End in place using the hex head screws.

3. Put the Table Top piece on the ground upside down. Place the partially assembled table from step two upside down on top of the Table Top and screw into place using the phillips head screws.

4. Slide the Table Shelf into the recess and screw into place using the remaining two hex head screws. Admire your awesome looking table.

5. We recommend sealing your Table Top (or the complete table) to keep it easy to clean from all the crafting and eating adventures. We recommend Ecolour Polyclear. If you decide to keep it raw, sand back stains with fine sandpaper periodically.
