“

At the beginning of the year it is difficult to keep focus through six days of running, biking and swim training. With regular sessions in my Novo, I am able to recover faster and can get further into the week before I start to break down. When championship race time comes around, I have my training and relaxation routine down, and I can make it all six days with quality workouts followed by great recovery.

ASCENT SERIES NOVO XT2 HEALTH & WELLNESS BENEFITS

REHABILITATION

35 expertly designed massage programs help the body recover from a variety of physical conditions, including back pain, Sciatica, Arthritis and Fibromyalgia.

RECOVERY

Regular massage helps athletes of any level prepare for, and recover from, strenuous workouts by increasing oxygen-rich blood to tired and sore muscles. This helps improve physical mobility and minimize recovery time from injuries.

RESTORATION

Modern life can cause stress injuries, such as tension headaches from excessive computer screen time or back pain from repeatedly poor posture. Daily massage corrects these daily strains in order to improve your overall health.

REJUVENATION

Massage helps to improve mental clarity and reduce anxiety. Even just 15 minutes of daily massage can contribute to better sleep, improved mental focus and a greater sense of well-being.

S and L TRACK SYSTEMS

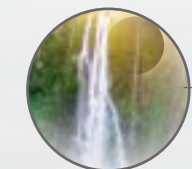

While the **L-Track** extends high performance coverage from your neck and shoulders all the way down to your glutes and thighs, the **S-Track** closely follows the curvature of the spine. The result is a massage that is designed to move with the natural curves of your body for optimal results.
