

It's not just a fishing rod, it's a...

LAMIGLAS

The Lamiglas Story

Lamiglas has been innovating in rod development since 1949. Starting as a blank manufacturer of fiberglass designs, Lamiglas evolved into the premier rod & blank company, offering technique-specific fishing rods. Innovating in graphite, fiberglass and composite designs, Lamiglas has always kept at the forefront of the industry through rapid responsive development work.

The first blank ever rolled at Lamiglas was an 11' fiberglass surf blank. Long 1-piece blanks have been a specialty of Lamiglas since the beginning. Building fiberglass blanks gave Lamiglas the ability to provide top-quality USA-made blanks for surf, freshwater, fly and saltwater builders.

Lamiglas invested in hiring top-level Boeing Engineers to pioneer blank designs that had never been produced before. This commitment to innovation and design provided the groundwork that continues to build today.

The Lamiglas Result

Factory-built Lamiglas fishing rods have been a staple of anglers for decades. Lamiglas has always been focused on innovating, even if it means being the first to try something new. As a result, Lamiglas designs have been emulated by rod builders and companies the world over. While many manufacturers have shied away from fiberglass and composite designs, Lamiglas goes full-steam ahead with them while offering the best in graphite and high-modulus rods.

With ultra-durable yet highly fishable saltwater options, Lamiglas has a strong foothold in both offshore and inshore rod design. The surf rod lineup is legendary, from the most popular surf rod ever built, the "GSB" to our latest creation, the Nightshift, Lamiglas Surf is here to stay. Salmon & steelhead rods are a first language to Lamiglas. With everything from ultra-sensitive finesse rods to powerful boat rods for trolling, the lineup is ultimately matched. The bass and walleye options provide tapers and actions that hit classic techniques squarely while allowing for some of the most precise and sensitive feels available. Fly anglers fishing for everything from Trout to Tarpon have options, while the rest of the lineup can outfit the most demanding of anglers.

Lamiglas continues to be focused on quality products and servicing our clients to the highest level. Our company looks forward to a continued positive relationship with all of the great anglers worldwide who enjoy this amazing sport of fishing.

The Lamiglas Team is committed to continuous improvement in our manufacturing processes, producing the finest quality fishing rods and blanks, servicing our clients to the highest level and continuing our innovative and industry-leading rod and blank design. That has been the hallmark of Lamiglas for 70 years, and it will continue for many more.

NEW for 2022!

TriFlex Inshore SE Series

Built to handle everything the warm inshore waters of the southeastern US have to offer. 6 spinning models ranging from a 6-12 lb. rated 7 footer all the way to a 7'10" tarpon stick.

Grander Offshore Series

Tuna, Mahi, Shark, Sailfish, Marlin, Swordfish, Kingfish beware, there's a new sheriff in town. The power and durability of these new rods have been blowing charter captains away this past year.

BFC Series

All models now feature a metal reel seat and metal gimbal butt with removable rubber caps.

BattleGlass

These classic fiberglass two-piece rods have a brand new look to them. Enter the BattleGlass.

GSB Surf

Two piece rods have been changed to 70/30, New silver guide color

Infinity Ultralight

Rods now feature an unsanded graphite finish for added durability, and small foregrip for added comfort

XP Bass Series

New reel seat, new guides, new look

G1000 Pro 11'6" Float Rod

The GP116MLS, an 11'6", 6-10 lb. medium-light powered float rod has been changed from a Michigan style handle to a normal spinning style handle.

X-11 Fly Series Updates - Now 4 Piece Rods!

We've redesigned our X-11 rods to make them better than ever! All X-11's now feature a Graphite Grey blank color and come in 4 pieces to easily transport. Available in 5-10 weights.

X-Factor Blank Line

An entire new blank line from Lamiglas, versatile tapers for salmon, steelhead, inshore, offshore, freshwater and everything in between.

Rod Labels, Actions, and Power

Reading A Rod Label . To select the right Lamiglas rod, pay close attention to the details. (We do!)

Surprisingly, there is no consistent, scientific methodology that all rod manufacturers use to rate their rods. Some use computers, others use complex graphs. We use fish...along with more than 70 years of experience.

Each rating is a collective recommendation of the hi-low thresholds in which the rod is designed to optimize performance. The variable factors for each rod, lure weight, line weight, action, and power are clearly listed throughout this catalog, as well as labeled on the rods just above the handle.

Action/Power/Type Defined

S	=	Spinning rod	UL	=	Ultralight	В	=	Bouncer
С	=	Casting Rod	L	=	Light	НВ	=	Heavy Bouncer
T	=	Trigger Grip	ML	=	Medium Light	J	=	Jig
-GH	=	Graphite Handle	М	=	Medium	МТ	=	Mag Taper
-M	=	Michigan Handle	МН	=	Medium Heavy	AK	=	Alaska Editon
RT	=	Roller Tip	н	=	Heavy	os	=	Old School Edition
R	=	Sliding Rings	ХН	=	Extra Heavy	F	=	Mooching Handle
			ххн	=	Extra Extra Heavy	cs	=	CenterSpin

Power

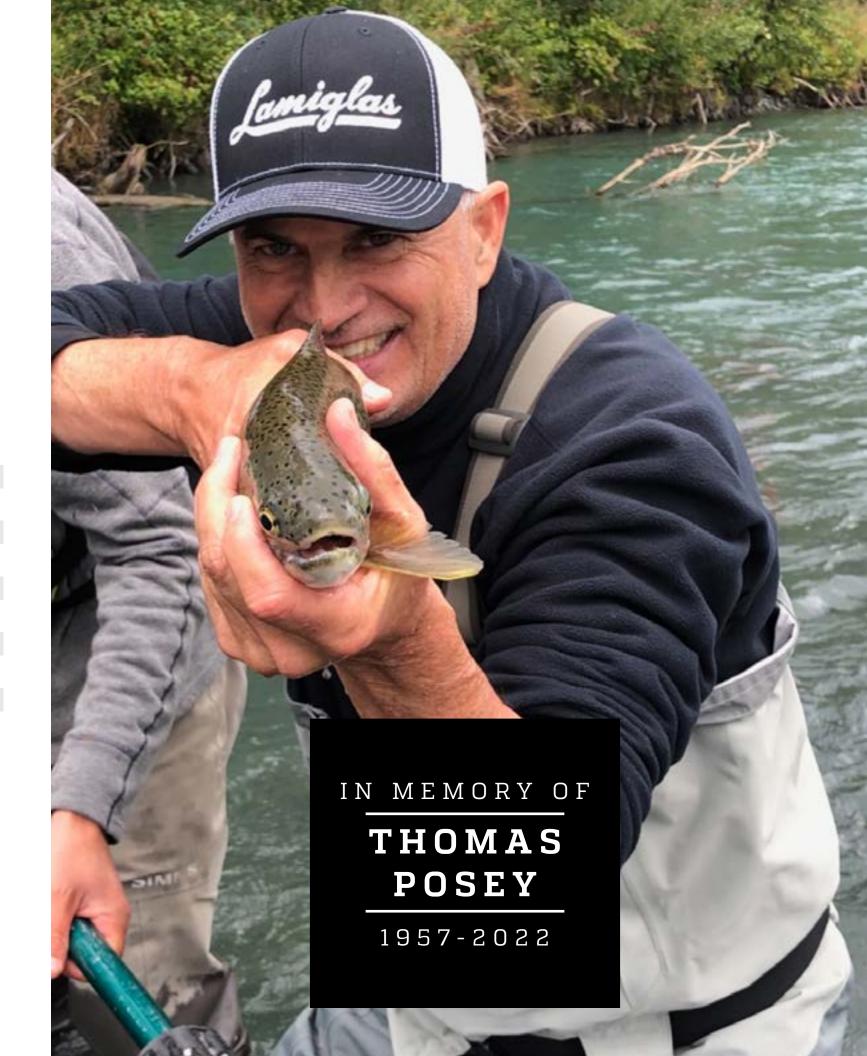

Applicable to all of our rods except our fly rods, "power" is defined by the amount of pressure required to flex the blank. These rods are designed to optimally manage a specific range of lure and line weights. The heavier the line and lure, the more power you'll need to cast, fight and pull effectively. The lighter the line and lure, the less power you'll need.

Weight

A rod that feels heavier each time you cast eventually slows you down. The type and amount of material used contributes greatest to this factor. Lamiglas selects the lightest material and components for the job, but we resist the temptation to go "too light". All rods can break. We design rods that will cast for a lifetime, without ever leaving your arms lifeless.

Taper

The measurement of change in the diameter of the blank from the tip to the butt is known as the taper. Many use the term synonymously with "action". But actually, taper is one of the factors which rod builders use to achieve the desired action. An aggressive taper at the tip creates a faster action. A straight taper (one which changes at an equal rate throughout the blank) creates a moderate or slower action.

CENTERPIN RODS

The Closer Centerpin

Centerpin fishing, reinvented

The rod that redefined what a centerpin rod is supposed to do. Perfect float control, mends, and hook sets with the fast action of the tip, with a parabolic bend throughout the rod to protect your leaders from breaking. 2', 4' and 6' float depth indicators and measured from the hook keeper for precise depth control. The oversize recoil guides and CFX carbon fiber handle will ensure your rod performs in the coldest conditions.

Rod	Blank	Length	Pcs.	Line Wt.	Lure Wt.	Handle	Action	Power

XCC Kwik

Redesigned in 2020

The XCC Kwik series rods have built up a reputation as some of the best salmon/steelhead trolling rods ever made, and for good reason. These rods allow trolled, back-trolled plugs, and bait to produce more action. Due to the fiberglass/graphite blend used, the rods allow the fish to take a solid hold on your bait before the graphite butt section sets the hook for you. Smooth refined actions are constructed to exacting standards for each models intended purpose. If you're hanging rods out of rod holders, pulling divers, loading into downriggers, sending plugs out...the XCC Series has you covered.

G1000 Pro Alaska Edition

USA Made-Alaska Proven

The G1000 Pro AK Edition is for salmon powerhouse angling. With blank designs that have been used heavily everywhere from the Kenai Peninsula to Mid-Coast California, these rods are built to perform for huge salmon. With double-foot guides all the way up and Fuji Reel seats, these are built for continuous fish-catching ability. Names like the "Kenai Special" and "Kenai King" are well known among salmon anglers in the Pacific Northwest and have a reputation for taming big fish.

Redline WARRANTY

Value taken to the next level

Built from a highly durable, yet sensitive graphite, the Redline series rods cater to the most popular techniques used for salmon and steelhead yet can handle hard fishing conditions and unpredictable fish. These are a favorite among our Professional Guide Staff. We've incorporated graphite handles with rubberized butt caps for extreme durability and longevity. Double-lock reel seats are featured on medium-heavy and heavy casting rods.

Redline Composite Series Affordable Salmon trolling rods

These fiberglass/graphite composite rods are brought to you in actions that have been proven for decades. The HS934HC and HS1064HC will help you put more salmon in the boat whether you are trolling flashers, plug fishing, plunking or working a downrigger. The moderate action of the fiberglass in the tip will allow you to read what your gear is doing at all times and allow the fish to take your bait without ever feeling the resistance of the rod, while the graphite in the butt section provides you with all the power you need when guiding the fish into your net.

The smooth graphite handle and slim rubber butt cap will not only feel exceptional in your hands but will perform great in the rod holder as well. A top-quality double locking Fuji reel seat and stainless-steel double foot guides round out a component set up that is unmatched at its price point. Backed by a Limited Lifetime Warranty. The Redline Composite Series from Lamiglas offers a top of the line trolling option at an incredible value.

X-11 Graphite Handle

The ever-popular X-11 is available with a graphite handle for extreme durability, solid grip and ease of cleaning. These graphite handles give a modern, attractive look, while offering benefits to boat and bank anglers alike. For salmon rod-holder rods, this is a highly popular choice to outfit a boat. Anglers picking up a rod to cast spinners or floats will find this series very attractive in looks, performance and price-point.

BattleGlass WARRANTE

These classic fiberglass two-piece rods have a brand new look to them. Enter the BattleGlass. These rods not only hook fish, they keep them pinned all the way to the net. The continuous moderate bend of the proven fiberglass blank optimizes your downrigger program, trolls baits flawlessly and allows your plugs to dance, yet quickly responds to the bite. There is plenty of bend in the rod to keep a salmon hooked on the way to the boat, yet enough backbone to provide lifting power when needed. This isn't your Grandpa's fiberglass rod, get ready for battle!

Nightshift **E**

The next level of Lamiglas Surfcasting

M4 nano particle technology meets carbon fiber to bring you a new level of performance in surfcasting. Inspired by the Surfcasters Journal Nightshift crew, these rods are created with a new type of M4 nano particle technology and reinforced with multi directional layered carbon fiber. What that adds up to is a lightweight, fast action rod, with a lightning fast recovery that still has the ability to load up evenly on a cast and launch a plug to incredible distances.

SuperSurf 2G Pro

Lightweight performance

These powerful, lightweight surf rods are built using our custom blend of two different proprietary graphite materials to shed tip weight and gain sensitivity while increasing the bottom end power and durability. The modified New Guide Concept layout brings out the true performance of the rod blank by distributing the load evenly throughout the blank, translating to more fish-fighting power and longer casting distance. The spiral wrap handle configuration will give you the feeling of more power in your hand and durability in harsh environments. The 2G Pro rods are outfitted with a double locking Fuji Deluxe DNPSSD reel seat tested to fit every size of Van Staal reel along with other popular surfcasting reels on the market. The 70/30 split, fast action, high modulus blanks are built for high end performance. The Super Surf 2G PRO is carefully handcrafted in the USA from start to finish.

GSB Surf

A legendary surf option

The Lamiglas GSB surf blanks have long been the staple of surfcasting in the Northeast. For decades the GSB has been the most widely used surf blank in the world, and it continues to be the number one choice for surfcasters today. The reason for that is the extremely durable graphite used in the blanks along with the unmatched versatility it offers, created by the finely tuned moderate action. The GSB will work better than most in open beach situations, but in the rocks, canals, and on the jetties the GSB has been unrivaled for decades. There are one-piece rod options and two-piece rods which are engineered to flex and perform like a one-piece. The rods feature a custom "X Flock" style handle with a double locking Fuji deluxe reel seat. The black stainless steel Fuji K

frame guides are laid out to a custom modified New Guide Concept layout to be optimized with the most popular reels used for surfcasting. The thread wraps are black with silver inlays and silver logos on the rod for a modern, stealthy look. Also featured on the 10- and 11-foot models is the "Mark of the 50," a 50" indicator on the blank, measured exactly 50" from the Fuji buttcap for a quick and accurate measurement of your fish of a lifetime! The GSB series surf rods are proudly handcrafted from start to finish in the USA.

Carbon Surf

Thoughtfully designed with the surfcaster in mind

This seven-rod series was meticulously designed by Lamiglas with input from today's top surfcasters. These rods are built with 30-ton carbon blanks to provide incredible power and durability; something that Lamiglas has been known for in the surfcasting community since the creation of our first "honey" fiberglass surf blank in 1949. The crisp moderate/ fast actions provide anglers with unmatched versatility in the surf, and the rods are outfitted with the highest quality components.built for high end performance. The Carbon Surf is carefully handcrafted from start to finish.

Insane Surf

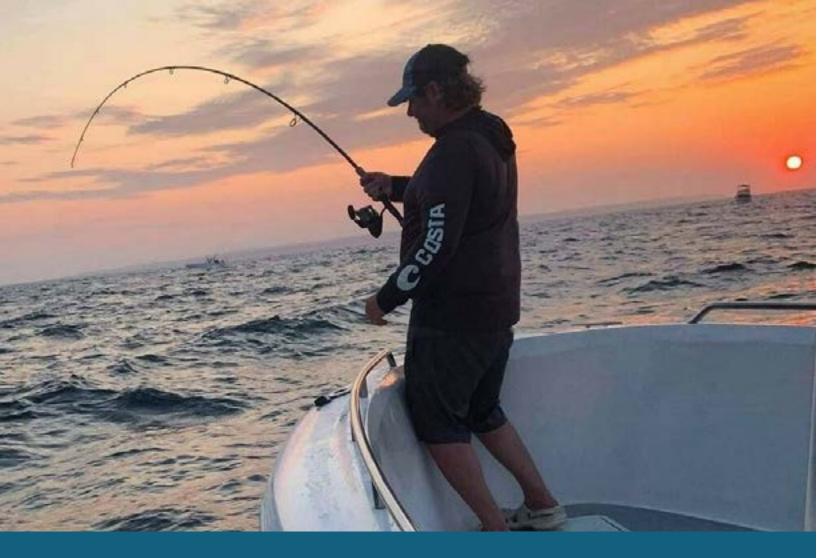

A new level of value

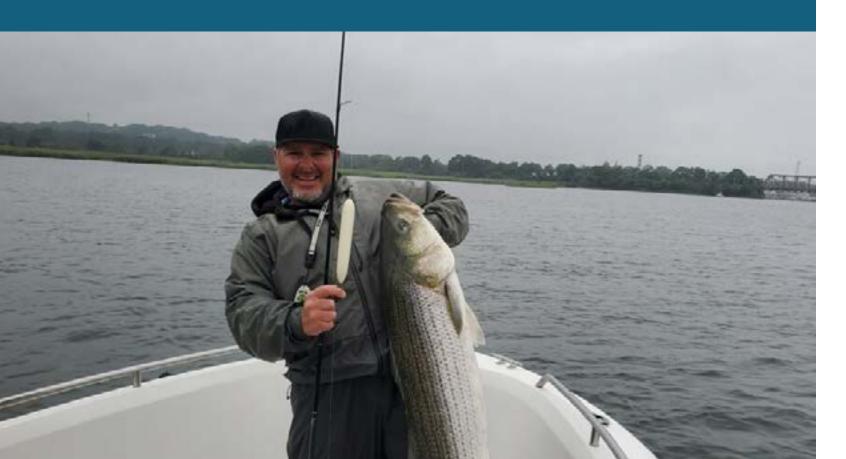

The Insane Surf series offers fine tuned performance at an affordable price. The moderate/fast action of the Insane Surf creates an extremely versatile rod for surfcasting and will do it all--throwing plugs and jigs from the rocks, to casting chunk baits from the sand. The rods feature a high gloss coat of black paint with red thread wraps and black components for an attractive, modern look. The custom "X Flock" style handle gives you a solid grip on the rod while contributing a light, sensitive feel. SeaGuide black K Frame style guides and reel seats were chosen for optimum performance. These 50/50 split two-piece rods come in four spinning models and two casting models to give you options for any situation.

Tri-Flex Inshore V2

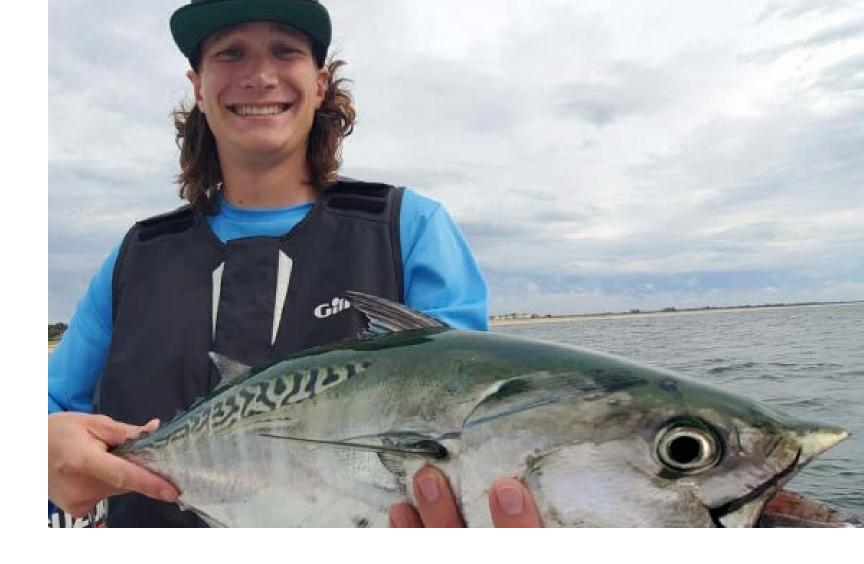

The top tier of inshore fishing rods

The Tri-Flex has become a household name in inshore fishing over the past few years. That's because the power and durability of these rods is unrivaled. Composed of a proprietary blend of two parts graphite and one part fiberglass, you get the lightweight and sensitive characteristics of a graphite rod while gaining the power and durability of fiberglass. Enter the TriFlex Inshore V2 series! Back by popular demand are some of the fabled CGBT blanks, trimmed to fit the most popular jigging and bottomfishing applications. We've also added spinning models for albies, stripers, fluke and more! The rods come in a stealth matte black finish and feature custom built CFX carbon fiber weave grips. The USA flag is also prominently displayed on every TriFlex rod to show your support for USA-made products.

Tri-Flex Inshore SE

The top tier of inshore fishing rods

This new line of inshore saltwater rods is comprised of six different one piece spinning rods built to battle anything that swims in the inshore waters of the southeastern United States. This rod series was thoughtfully developed by Lamiglas and tested by profession- al fishing guides who live, eat and breath inshore saltwater fishing in the southeast. The Tri-Flex SE is an extension of our legendary Tri-Flex Inshore series and are handcrafted in Woodland, Washington. The blanks are built with our proprietary blend of two parts light and sensitive graphite and one part extra durable fiberglass, then finished off with the finest components available. Backed by a Limited Lifetime Warranty.

Grander Offshore

Powerful composite rods

A grander is an offshore term for a fish of a thousand pounds or more, and that's just what these rods are made to handle. Featuring durable E-glass blanks and premium components, these rods were built for performance and durability. Heavy duty conventional and roller guides, thick EVA foam foregrips with Aftco uni butts on most models. Two live bait models as well to put a few extra mahi in the boat while you're out there.

Bluewater MARRANTY

Powerful composite rods

From vertical jigging to trolling, fishing live bait to casting swimbaits, the Bluewater is one rod you will not want to put down. These rods are made from a composite of fiberglass and graphite, allowing them to handle more weight and pressure than most rods could only dream of, yet they have an ultra-thin diameter and are super light. Strong high quality components and an offshore style "X Flock" handle will keep this rod going for years to come. A stunning agua blue finish will make it stand out from the rest.

WALLEYE RODS

The Detroiter SYRREMINE STATE OF THE PROPERTY OF THE PROPERTY

The end game for walleye

Not only are these rods eye-catching, they will also help you catch more walleye! Extremely lightweight and sensitive, but also very capable with extra fast actions and the backbone needed to work jigs in deeper water. The 5'6" model, dubbed "The Detroiter," is the stiffest walleye jigging rod we make and is the perfect option for heavier jigs in depths of 50 feet of water or more. Backed by a 5 Year Limited Warranty from Lamiglas.

The Closer Walleye

Taking walleye jigging to the next level

"The Closer" Walleye rods prove that the perfect walleye rod will produce more fish hooked and more fish in the boat. An extra fast tip action will help immensely on hook sets in deeper water and strong currents. The extremely high modulus graphite is truly capable of feeling fish both on the top of a jigging motion or on the fall. With custom woven CFX carbon handles that are optimized for a sensitive, balanced feel, high quality double locking Fuji reel seats, and larger guides to decrease icing when jigging in colder temperatures, we've made every effort to provide the best walleye rod design ever.

The Hammer WARRANTY

Put the hammer down!

This series of jigging rods from Lamiglas brings walleye anglers an incredible option at an exceptional value. The rods are extra fast action and ultra sensitive for maximum performance when jigging walleye in shallow or deep waters. Stainless steel guides with alconite inserts allow your line to travel through the guides smoothly and efficiently. A classic cork handle is complemented by a carbon fiber tube underneath the reel seat with an adjustable foregrip to fit almost any size spinning reel. The rods also feature a polished graphite finish for maximum sensitivity and attractive walleye green accents. Backed by a One-Year Limited Warranty. You will be hard pressed to find a better walleye jigging option in this price range!

Salmon-Steelhead Blanks

The Closer Centerpin

How could you describe a fast tip with a beautiful moderate bend? Two words...THE CLOSER. This series has shaken the "float rod" world. It sounds idealistic to have power, sensitivity, leader protection, and beauty all in one blank, but it's not. We are confident when we say that The Closer series models are the finest float blanks in the world, and that's why they continue to sell to builders and anglers anywhere steelhead and salmon are found.

Blank No.	Length	Pcs.	Line Wt.	Lure Wt.	Butt Dia.	Tip Size	Finish	Avg Wt.	Action	Power

SI Blanks

When you've decided you're ready to build the best rod possible, the SI series will be waiting for you. With the perfect combination of sensitivity, power and lightweight performance, these blanks will translate to finesse techniques. The graphite weave in the butt section counterbalances perfectly, the tip sections are efficient fish catchers.

Blank No.	Length	Pcs.	Line Wt.	Lure Wt.	Butt Dia.	Tip Size	Finish	Avg Wt.	Action	Power

Surfcasting Blanks

GSB Surf Blanks

GSB series blanks are hands down the most well-loved surf blanks ever produced. They are ridiculously durable, but they are also amazing to fish. The versatility of these blanks cannot be overstated. Anglers have long used them for plug fishing, live bait, bucktails, and every other imaginable technique. The moderate action makes for easy casting, with depth and accuracy. They have the power to pull fish around rocks and boulders and are a Northeast staple for that reason. Beautiful gloss graphite in 1 piece and 2 piece options. The GSB1101ML is the ever popular "John Skinner" blank, and the OS models designate popular actions from decades ago created using newer materials.

Blank No.	Length	Pcs.	Line Wt.	Lure Wt.	Butt Dia.	Tip Size	Finish Avg Wt.	Action	Power

SuperSurf 2G Pro Blanks

These surf rods are all about sensitivity, fast action and moving power. Perfect for launching plugs or bait out into the open surf, the SuperSurf 2G blanks are also the most attractive blanks on the beach without a doubt. With 70/30 split options and telegraphic tip sections, these go out of their way to provide rod-builders a modern surf blank to build upon.

Saltwater Blanks

Tri-Flex Graphite V2 Inshore

Two parts graphite, one part glass. These options span the range of inshore techniques but provide one consistent message: durability and finesse can be one. With blanks that can do everything from heavy three-way bait techniques to plug fishing and jigging, this inshore series has been depended on for fisheries that require something special. Ratings on blanks differ based on casting or sinker weight.

Freshwater Blanks

Infinity Ultralight Blanks

Sensitivity is mentioned time and time again, but maybe we need to emphasize it here. The expensive but necessary graphite we buy to create these blanks responds quickly, but the taper we designed still feels totally "ultra-light." Diameter is small, balance is excellent...this is probably one of the most enjoyable blanks in the world to fish.

Blank No.	Length	Pcs.	Line Wt.	Lure Wt.	Butt Dia.	Tip Size	Finish	Avg Wt.	Action	Power
AFW84ULF2	7'	2	2-6	1/16-3/8			Unsanded Graphite		Mod/Fast	Ultra/Lt
ESH902UL	7'6"	2	2-8	1/8-3/8	0.443	4.5	Unsanded Graphite	1	Mod/Fast	Ultra/Lt

XCC Bait & Troll Blanks

All glass in the tip, all graphite in the butt section. You'll see the layers of composite materials in this blank, which results in a unique look. Beyond just the look, the action of the tip is perfect for plugs, bait and other trolling techniques. Once you get to the graphite butt section, the fight will be in your favor. Loads of backbone with that limber tip you need for some fisheries.

Blank No.	Length	Pcs.	Line Wt.	Lure Wt.	Butt Dia.	Tip Size	Finish	Avg Wt.	Action	Power

G1000 Pro Fly Rod Blanks

Precision casting, powerful two-piece fly rod blanks. The bass and inshore markets are especially partial to these blanks, though trout, steelhead and salmon anglers have been building on them for decades. Classic designs with modern graphite development. We have added 3 great new 10' blanks this year for nymphing or chucking your streamers out even farther off the beach!

Lamiglas Rod Warranty

How do I make a rod warranty claim?

If you are certain your broken rod is a manufacturing defect and your rod is under the appropriate warranty period you will need to send an email with the following information to customerservice@lamiglas.com. You may also complete the Warranty Check In form, found on our website at www.lamiglas.com.

- Photograph of rod clearly showing model number as printed on rod label
- Photograph clearly showing the broken area(s) of the rod
- · A brief description of how your rod broke
- Your mailing address and a daytime contact number

We do not offer repair or parts for rods. When we receive the above information a trained Lamiglas warranty technician will inspect the claim and will be in contact with your warranty options.

What if I accidentally broke my rod or it's out of the warranty time period?

If you broke your rod by accident, send us the same information listed above in the warranty claim section to customerservice@lamiglas.com explaining what happened or fill out the Warranty Check In Form on our website.

Everyone has broken a rod by accident, but Lamiglas is not going to penalize you for it. We are going to give you a great deal on a new replacement rod to get you back on the water.

Warranty Periods

Each Lamiglas rod has a specific warranty period depending on the series. Each Lamiglas rod also has a date stamp serialized on it to identify its age. If you cannot find the date stamp a trained Lamiglas technician will be able to tell you the exact age of the rod after sending in the above information.

Limited Lifetime

Lamiglas Closer Rods, Si, Infinity, XCC, G1000 Pro, Redline, Nightshift, Super Surf, GSB, and Tri-Flex.

5 Year Limited Warranty

Lamiglas Carbon Surf, Grander Offshore, Assassin Walleye, Black Inshore and Bluewater series.

1 Year Limited Warranty

All X-11 rods, Insane Surf, Insane Saltwater, BFC, XP Bass, Hammer Walleye and All Kokanee series rods (except for the XCC).

Lamiglas does not warranty fishing rods used for commercial purposes.

Normal wear and tear or misuse or mistreatment of the product are not covered in our limited warranties.

Prolong the Life and Performance of your Lamiglas Rod

Lamiglas fishing rods are built with the finest materials available and constructed to exacting standards. Our expectations of every rod are extremely high. With some common sense and careful handling, your Lamiglas rod will offer a lifetime of exceptional experiences. The following are some tips and tactics that will help out along the way.

Line Ratings

The individual characteristics built into each and every Lamiglas rods highlight the rods intended use. As a part of that, the strength and flex of the blank is balanced to the recommended line ratings. A Lamiglas rod is rated so that when the rod is held at a 45 degree angle or ledd, line will break before the rod does. Angles greater than 45 degrees transfer undue stress to the tip section of the rod (practically eliminating the ability of the stronger butt section to carry any load), and in extreme cases can result in rod failure with as little as 2 pounds of directed pressure. This is known as "high sticking". It is not only proper use that requires a rod angle of 45 degrees or less, but this is also the area where you'll find the greatest power from the rod and have the best control over the fish.

Lure Ratings

Lure ratings provide a range of lure weights in which exceptional performance will be found. Using a lure that is lighter than the listed weight will not properly load the rod, resulting in reduced casting distance and sensitivity. Using a lure that is heavier than the listed weight will overpower the rod. Again, distance and sensitivity will suffer, along with the compounded problem of overstressing blank fibers.

Reel Installation and Removal

Prior to reel installation, lubricate the reel foot and threads of the reel seat. Insert the reel and tighten the lock nut finger tight. Move the reel side to side and tighten again. Repeat the process until the reel no longer moves. Graphite reel seats should never be over tightened, and pliers should never be used in that process. Over extended periods, the reel seat may seize to the reel foot. Slowly loosen the locking nut. If it starts to seize, tap the reel seat hood. This will break loose the deposits that have built up over time. Continue to loosen the nut. If the hood is not tapped loose from the reel foot, you risk separating the hood from the locking nut.

Transportation

The key to rod transportation is eliminating sharp impact to the blank. The best place for a rod to travel is inside of a protective sleeve or tube. If not carried in a tube, the rods should not be left to bounce against other rods or terminal rigging (weights, swivels, lures, etc.). Always affix the sections tip to tip and butt to butt. This keeps the delicate tip from being crushed against the uneven and much larger handle.

Storage

Store rods in either the horizontal or vertical position. If leaned in a corner, a set or bow can occur over time. Never leave your rods where critters can get to them. Scents, salt from perspiration and other biological contaminants are a surefire attraction to undesirables.

Cleaning The Rod Blank

The best cleaner we have found for cleaning the blank and handle is a mixture of one part isopropyl alcohol and four parts warm water, along with a good dose of liquid dish soap. Using a soft sponge, scrub the blank and handle, then rinse with clean water. Dabbing problem areas with the soap mix for a few minutes before scrubbing can soften heavy build up. Once you have the rod clean, a coat of wax will simplify the maintenance of a beautiful finish. We recommend any of the carnuba based car waxes. Fish scales and many types of bait will not stick to a waxed rod and makes cleaning them very easy. If you are fishing everyday, a coat of wax every week should suffice.

Cleaning Guides And Reel Seats

As strange as it may sound, the use of a toothbrush and toothpaste will remove the stubborn deposits on rod guides and reel seats. After cleaning the reel seats, coat with any light oil. This method works on all reel seats.
