

**Q1: Can the B230 battery modules be used alone?**

Yes. B230 has a 100W USB-C, a USB-A and a 12V DC output ports, the battery module can work flawlessly when standalone.

**Q2: How many B230 battery modules can connect with AC200Max?**

A: Up to 2xB230 battery modules can connect with AC200Max.

**Q3: How many B230 battery modules can connect with AC300?**

A: AC300 can only connect with B300 battery module.

**Q4: How many B230 battery modules can connect with AC200/P?**

A: Up to two B230. One via the solar input port by a converter cable, and another via the AC adapter inlet.

**Q5: What are the charging methods for the BLUETTI B230?**

A: B230 can be recharged by:

- 1) 500W AC adapter (Sold separately)
- 2) Car cigarette lighter output or solar panels (Require the BLUETTI D050S - DC charging enhancer, sold separately).

Notice: There is only one inlet on the battery module, so it cannot be charged by more than one charge method simultaneously.

**Q6: Can you ship the B230 to Puerto Rico, Hawaii, and Alaska deliver?**

A: Can not. The packages exceed the transportation weight limit of the logistics company.
