

Inside Top Lock - A top bolt lock is included for the inside of this Canopia By Palram greenhouse.

Bottom Lock - This Canopia By Palram greenhouse has a bolt lock on the bottom of the door.

Door Handle Holder - A built-in holder conveniently allows you to open the door of your greenhouse and secure it on windy days.

Aluminum Door Hinges - The door hinges of this Canopia By Palram greenhouse are made of aluminum for added strength and durability.

Included Roof Vent - This Canopia By Palram greenhouse includes one roof vent to help promote interior air flow and keep your plants comfortable. These vents have been newly redesigned with aluminum frames instead of plastic for added durability and ease of assembly.

Reinforcement Cable - The frame of the greenhouse is further strengthened and secured with a high-strength reinforcement cable.

Sealing Rubber Strips - The greenhouse is further weatherized by sealing rubber strips that act a gasket.

Extruded Resin Frame - Canopia By Palram greenhouses have sturdy and durable frames made of extruded resin. This resin provides more insulation than typical aluminum greenhouses. The frames are UV-protected and the green color blends in nicely with outdoor garden settings. They assemble quickly with Canopia By Palram's unique Pin & Lock System.

Aluminum Profiles - Canopia By Palram greenhouses now have aluminum profiles built into the roof frame. This further strengthens the greenhouse and allows the polycarbonate panels to easily slide into place.

6mm Polycarbonate Side Panels - The twin-wall polycarbonate side panels in Canopia By Palram greenhouses have been increased to 6mm from 4mm. This provides much more insulation and improved product strength. The panels are completely UV-protected and provide high wind and hail resistance as they are virtually unbreakable.
