

Un(b)lock The Power Of Blockchain

# LEADING GLOBAL BLOCKCHAIN COMPANY

50+

PROJECTS

- » Cobalt Ethical Supply Chain
- » Fortune 50 Retailer
- » Loyalty – Public Company
- » Bombay Stock Exchange
- » Land Registry – Multiple Govts.
- » York University
- » Cashe

5+

MODULAR  
SOLUTIONS

5

GLOBAL OFFICES

- » Toronto – Corporate Headquarters
- » Singapore & Tokyo – Sales Office
- » Hyderabad – R&D Lab & Development
- » Noida – Software Development Center

100+

BLOCKCHAIN  
SPECIALISTS  
GLOBALLY

11

STRATEGIC ALLIANCES

- » Alliance with PWC, KPMG, MNP
- » Blockchain in Transport Alliance
- » Partner of Enterprise Ethereum Alliance
- » Partner of Hyperledger & Linux Foundation
- » Authorized IBM Business Partner
- » SIA Alliance
- » Technology Partner of Bombay Stock Exchange
- » Partner Comtel Solutions, Singapore

# PRODUCTS + TOOLS + KERNELS = PLATFORM

- » Comprehensive, integrated pre built modules
- » Quickly realize value inherent in distributed data & blockchain-centric solutions
  - » Including transparency, trust, rule-based action (smart contracts), dramatically improved security & eliminate redundant middle layer of people, services and technology
- » Plug & Play - Rapid adoption & deployment of its modules and expeditious, standard-based blockchain services (application specific integrated kernels)

**DL ASSET TRACK™**

## Supply Chain Management Platform

### Optimize Multi-Party Processes

DL Asset Track™ offers a uniquely secure platform to record transactions and digital interactions in a transparent, robust, auditable, and efficient manner. It records and updates all transactions in real time, making the information available to all authorized participants. It is a completely modular platform with an intuitive graphical interface specifically tailored for supply chain management.

- End-to-end visibility of assets across the supply chain
- Authenticate provenance of material, ensuring responsible and ethical sourcing
- Lower administrative costs and reduce error rates

**DL WALLET™**

## Payments Platform

### Facilitate Peer-to-Peer Transfer of Financial Assets

DL Wallet™ is a sophisticated peer-to-peer network built with Distributed Ledger Technology that supports loyalty units, fiat currency, and cryptocurrencies. It is built on an immutable ledger that records every transaction in a tamper-proof, secure, and frictionless manner.

- Bypass third-party intermediaries and increase transaction speed
- Reduce operational costs
- Support digital assets like loyalty units, fiat currency, and cryptocurrencies

**DL DATA CONSENT™**

## Personal Data Management Platform

### Comply with Data Protection Legislation Such as GDPR and Protect Personal Information

DL Data Consent™ seamlessly navigates regulations such as GDPR to ensure that organizations provide the utmost protection of personally identifiable information (PII) while still affording their clients the right to erase their information from legacy systems. It uses Distributed Ledger Technology to offer organizations the security of keeping a record of meta-data (PII, consents, claims, etc.) and the ability to audit this information.

- Enable information owner to review shared data and the legal basis for sharing the same
- Enable information owner to grant or revoke consent
- Record and audit all activity real time, in a tamper-proof manner

**DL REGISTRY™**

## Records Management Platform

### Maintain a Trusted and Immutable Record of Credentials, Titles, and Proofs of Ownership

DL Registry™ offers organizations the assurance to confidently transact with indisputable, easily accessible and verifiable digital assets. It eliminates potential failures and attacks while significantly reducing reliance on third parties.

- Create a secure, trusted, transparent and an immutable record
- Verify records in real time
- Reduce administrative costs
