

BELLA VISTA

Quick Guide – MyHomeworkHelp

What is [MyHomeworkHelp](#)?

We are launching a new online homework resource. Weekly answers to the Exercises and/or Homework in the study booklets will be accessible to parents. This is a password protected site that parents can access to assist in completing their kids' homework (i.e. to be used as a check point when helping to work out the solution or answer to the exercises and/or homework questions). Students can also use this service to get extra help with their homework and revise their previous class works.

Expectations of your child's performance must be made with a consideration of your child's starting point. Based on experience, it takes *more than six months for a below average student to improve to the average level*, even if they are spending more than three to four hours a day studying and revising their homework.

How long will the answers be accessible on the MyHomeworkHelp website?

To ensure the site operates efficiently, a maximum of three weeks' answers per subject, year level and term will be accessible in MyHomeworkHelp.

Why is it password protected and how do parents get notified of the new passwords?

Since this is an initiative by our Bella Vista centre and exclusive to the Bella Vista students, the site is password protected with the password changed every month. Notes will be sent home with the new password and this will also be posted in the centre's board (Reception area). You can also text/email us anytime to receive the password.

How do we access the site?

1. Go to: <https://myhomeworkhelp.myshopify.com/>
2. Add this to your favourites for easy access next time.
3. Once you are on the site, click the button 'ENTER USING PASSWORD' on the top right side and then enter the password. No log out is required once you have finished accessing the site.
