ECOLIP ELIXIR

Welcome to LaJAshley's EcoLip Elixir, the gateway to making your very own vegan lip balm! It's not just about crafting lip balm; it's about embracing the power of natural ingredients and learning why avoiding harsh chemicals is essential for your well-being.

What's Inside

Part A

- **Vegan Lip Balm Base:** 92.0% (9.2 grams)

Part B

- **Essential Oil:** 1.0% (0.1 grams or approximately 2 drops)
- **Zinc Oxide:** 7.0% (0.7 grams)

Total: 100.0% (10.0 grams/ ~ 0.5 oz)

LET'S MAKE IT!

Step 1

Start your lip balm adventure by scooping out the **Vegan Lip Balm Base** from **Part A** into a beaker. You can use a wooden spoon or spatula for this.

Step 2

It's time to bring your lip balm base to life. In a safe and fun manner, melt the wax by using one of two methods:

- **Method 1:** Microwave it for 5-10 seconds, checking every 5 seconds to ensure it's not overheated.
- **Method 2:** Boil 1 cup of water and place the beaker with the lip balm base into the hot water.

Carefully stir the wax with a wooden spoon until it's completely melted.

Step 3

The magic continues as you add the **Essential Oil and Zinc Oxide** from **Part B** into the mixture. Mix it carefully to evenly distribute the fragrance. Optionally, add a small amount of color (food-grade) to experiment with different lip balm shades

Step 4

Your EcoLip Elixir is ready! Package it in a 0.5-ounce jar container and feel the delight of having your very own, all-natural, and vegan lip balm.

What's Inside

Candelilla Wax, Organic Sunflower Seed Oil, Mango Seed Butter, Sweet Almond Oil, Jojoba Seed Oil, Castor Oil, Vitamin E, Zinc Oxide

Vegan Lip Balm Base: This base is the heart of your lip balm, offering superb moisturization and nourishment for your lips. It's free from animal products, aligning with our commitment to nature.

Essential Oil: The essential oil not only provides a wonderful fragrance but can also offer a sense of calm and well-being. It's like a little burst of nature's magic in every application.

Zinc Oxide: a key ingredient in LaJAshley Little Science Lab Sunscreen Edition, offers natural protection against harmful UV rays, ensuring safe and effective sun protection.

Why Avoid Harsh Chemicals

Many commercial lip balms contain harsh chemicals, which can be detrimental to your lip's health. These chemicals may cause dryness, irritation, or discomfort. By creating your own EcoLip Elixir with natural ingredients, you're taking a step towards better lip care and learning why avoiding harsh chemicals is a smart choice for your well-being.

Experiment with Colors: One Drop at a Time!

● **Blue Butterfly Bliss**

- Add a drop of blue (Butterfly Pea) for a magical and serene touch to your creations.

● **Red Sorrel Hibiscus**

- Introduce a drop of red (Sorrel Hibiscus) for a vibrant and energetic twist.

● **Orange Carrot Squeeze**

- Infuse a drop of orange (Carrot) for a burst of carrot-y warmth.

💧 **Neutral & Simple**

- Keep it neutral without adding color allowing the true essence to shine.

Have a blast creating your own colors! Mix them together like magic, then add the fun to your special masterpiece! Be sure to give it a little shake before using.

✦ **Experimentation Tips** ✦

- Start with one drop and mix thoroughly.
- Gradually add more drops for your desired hue.
- Have fun creating a spectrum of colors in your lip balm, body butter, and/or hair & body mist!

Remember, it's all about expressing your creativity and making each creation uniquely yours. Happy coloring!
