ODOO SOFTWARE DEVELOPER (m/f)

You

- have at least 2 years of work experience with Odoo development
- speak English fluently (German is a plus)
- have a working permission for Austria
- have a high operational readiness, you are reliable and committed
- have experience with Python and PostgreSQL
- have experience with REST APIs
- use git for version control (experience with Gitlab is a plus)
- Continuous Deployment (CD) and Continuous Integration (CI) experience is a plus
- eCommerce development experience is a plus
- are curious and like to explore - not only getting your job done

Job

- you will mainly work in backend development for our ERP system (Odoo), helping our team to maintain and improve workflows and ship new features
- you will define and implement new business cases in Odoo, building custom modules and extend existing ones
- you will help our team to migrate and use the most recent version of Odoo
- you will work together with a small team of certified Odoo developers, designers and content managers

About us

- we are an internationally successful start-up focused on high quality bikes for kids and teenagers, but this is only the beginning
- we are an open-minded international team with more than 10 nationalities
- we are a very agile team and like to try out new things
- we have more than 80 innovative projects in the pipeline - some of it revolutionary
- our workplaces offer an amazing view to the hills and the Danube river
- everyone is important, everyone counts!

Benefits

- define your personal development environment (laptop/PC)
- educational budget
- free public transport in Vienna (and Klosterneuburg)
- 25 days of paid vacation per year
- free gym on the ground floor
- unlimited coffee, sweets and fruit
- team events like cycling, skiing, snowboarding and our legendary woom afternoons
- special offers on great woom products
- support in relocation when coming from abroad

This position is paid with EUR 49.000,00 gross per year at minimum. **But let's be honest: we talk about your real salary in the personal interview and define it based on your experience and qualification.**

Please send your application incl. your CV, examples of your work (links to live examples are preferred) and your GitHub profile and/or Stack Overflow profile to Valerie Ferencic
