ABOUT CUISINART

Julia Child let people in on the Cuisinart secret and so did James Beard. They were among the first culinary experts to endorse the food processor as a revolutionary kitchen appliance when it was introduced in 1973 by the late Cuisinart founder, Carl Sontheimer. They saw the food processor as a quick and easy way to make fine food and healthy dishes.

Cuisinart has proudly continued this legacy of innovation with exciting new product introductions in all areas of the kitchen. Today, Cuisinart is a full kitchen resource. The company manufactures and markets a comprehensive range of kitchen products including the iconic food processors, coffeemakers, countertop grills, toaster ovens, toasters, waffle makers, stand mixers, blenders, hand mixers, kettles, specialty appliances, cookware, cutlery, dinnerware, flatware and tools and gadgets. No one covers the kitchen like Cuisinart!

A trusted brand with over 40 years of experience, the company is committed to innovation, quality and exceptional workmanship in the development of all of its products. Cuisinart's design and engineering team has more than 600 people worldwide. Its commitment to quality is backed with exceptional warranties - most small appliances carry a 6 month warranty.

With a rich history of innovation and quality workmanship across a wide array of products, nobody covers the kitchen like Cuisinart.
