

Empire Pole Swag

9244

18" - 20" Depth

An elegant pole swag. Much easier to make than the usual Kingston Pole Swag. **Swag widths extend 14" to 20"**. Use as many as needed to fit the window. **Swag depths are 18" or 20"** at the deepest point. Choose from two horn styles. Use the simple return or the wide jabot. **Jabot hangs 40" or 42"** from the top of the pole. Alteration instructions are included for the jabot. The swag has an open "droop" area of 4" from the bottom of a 2" pole.

Fabric Suggestions: Soft and light to medium weight fabrics are best. Thick, bulky fabrics will create some difficulty with pleat stack up on top of the pole. The jabots, returns, and the horns will need to be self or contrast lined. The swags can be lined with a regular drapery lining. If no trim is being used, it is best to add a small facing (decking) to the bottom of the swag.

YARDAGE

To know how many swag sections your window will need: if you are using jabots subtract 11" from the pole measurement (do not count the projection) and then divide into equal units. **Swag width size should stay between 14" to 20"**. If using returns instead of jabots, subtract only 2 1/2" from the pole face measurements.

- You will need a *pair* of returns or a pair of jabots.
- You will need a horn between each swag.
- You will need a horn between a swag and a return.
- You will *not* need a horn next to the jabot.

With so many different fabric widths and repeats available today, we find it works best if we give you the actual pattern sizes so you can determine how they will fit on your fabric.
