

Upholstered Cornices

17-20

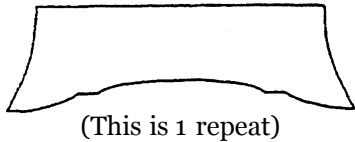

9252

This package contains patterns and alteration instructions only. Complete instructions for making upholstered cornices are in the M'Fay Workroom Manual, Supplement 1.

Width Adjustments

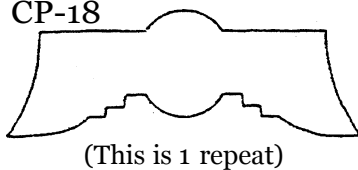

(Face can be any depth)

CP-17

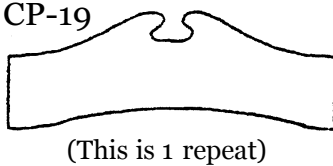

One horizontal repeat will adjust between 34" and up, measuring straight across the top. The wings flare out an additional 5" at the bottom. The difference in deep point and short point is 5".

CP-18

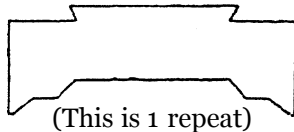

One horizontal repeat will adjust between 35" and 70", measuring straight across the top. The wings flare out an additional 5" at the bottom. The difference in deep point and short point is 6", with the top center protruding up another 3".

CP-19

One horizontal repeat will adjust between 30" and up, measuring straight across the face. The difference in deep point and short point is 2", with the top center protruding up another 6".

CP-20

One horizontal repeat will adjust between 30" and up, measuring straight across the face. The difference in deep point and short point is 6", with the top center protruding up another 2".

YARDAGE

For the width, allow for the flat front, plus seams and returns.

Allow for the deepest depth, plus at least 2".

Yardage for trims should be decided after your selection of size, and after alterations have been made to the pattern.
