

Wilshire Pole Swag

22" and 24" Depth

9256

A Wilshire swag has a Shirred seam in the middle. It also has a decorative scalloped edge. The middle of the swag attaches to the pole as well as the pleated ends. The droop area is 3" to 4" from underneath a 2" pole. The illustration shows two swags used. **Swag widths extend 32" to 58"**. A **horn, 26" deep** hangs over the swag seam. The **center tail is 21" deep**, and the **jabot hangs 42"**. The horn, tail, and jabot can be altered. The **tieback sizes are 24" to 30"**. Rope and tassels are knotted and used at each end of the pole. The cover photo shows an ornament above the pole. It is a holdback attached to the wall and appears to rest on top of the pole.

Fabric Suggestions: Bulk is not a major problem, but damask and other similar weight, soft fabrics are ideal. Silk and crisp, lighter weight fabrics do well with a heavy trim. Trims must be soft and able to curve. The horn, tail, and jabots should self or contrast line. Tiebacks should be interlined or interfaced.

YARDAGE

The center tail finishes 10" wide. A swag will overlap it 2" at each side.

For each center tail used, deduct 6" from the pole face measurement. Then divide by the number of swags desired. This will tell you what your swag size should be. **Stay within 32" to 58"**.

With so many different fabric widths and repeats available today, we find it works best if we give you the actual pattern sizes so you can determine how they will fit on your fabric.

(Two cuts are needed per swag)
