

Drapery Swags II

9258

These swags are usually placed in front of a drapery and attached to the same rod. **Swag D, width will adapt 16" to 24" with the depth varying from 25" to 24"**. All of the swags have 5 folds. **Swag E, width will adapt 12" to 20" with the depth varying from 23" to 22"**. This swag has a pointed bottom edge. **Swag F, width will adapt 12" to 20" with the depth varying from 21" to 20"**. This swag has a curved bottom edge. The **50" deep jabot** shown with Swag D and E is separate and offers a return. It cannot be altered.

Drapery swags are more effective with a heavy trim. Measurements above do not include trim.

Fabric Suggestions: All fabrics must be soft. Fabric bulk can be a problem in the pleat stack up on the swags. The jabot will have no bulk problems, the fabric can be as thick as you like as long as it is soft. The jabot should be self or contrast lined. If no trim is being used, the lining may show around the edge on all swags.

YARDAGE

With so many different fabric widths and repeats available today, we find it works best if we give you the actual pattern sizes so you can determine how they will fit on your fabric.

Swag D (bias cut)	the pattern is	40" wide x 40" deep
Swag E (bias cut)	the pattern is	34" wide x 34" deep
Swag F (bias cut)	the pattern is	34" wide x 34" deep
Jabot	the pattern is	31" wide x 59" deep

Same amount of lining will be needed.

Yardage for trims

Trims must be able to curve.

Swag D	59"
Swag E	52"
Swag F	50"
Jabot	92"
