

Classic Empire Valance

9284

20" to 22" Depth

This Empire style valance offers you the standard classic horn, or use the new gathered horn that extends an additional 4" above the top of the board. The horn gathers may be secured simply by stitching or tying with a ribbon or a fabric knot (pattern enclosed). Choose between a simple return or the ornate jabot. The jabot displays an inverted pleat, a few gathers at the corner, and a point at the bottom. **Swag depths are 20" to 22". Swag widths are 16" to 28".** Swag depth and width is not adjustable beyond these limits. **The short point on the horns are 6" shorter than the swag. The jabot hangs 35 1/2" deep.** Alterations can be done at the top only. Alteration instructions are included to adapt the horns and the jabot to fit other Empire patterns, such as the M'Fay 9001 and 9234.

Fabric Suggestions: Soft fabrics work best. Stay away from extremely bulky fabrics. The jabots, returns, and horns should have a self or contrast lining. The swags can be lined with a drapery lining. Any trims used will need to be able to curve.

YARDAGE

To determine how many swag sections to use: When using simple returns, subtract 3" from the board face measurements (do not include board "ends") and divide into equal units. When using jabots, subtract 19" from the board. **Swag width size must stay within 16" to 28".**

In addition to the swags, you will need:

- A pair of jabots, or a pair of returns
- A horn between each swag and between a swag and a return or jabot.

With so many different fabric widths and repeats available today, we find it works best if we give you the actual pattern sizes so you can determine how they will fit on your fabric.
