
Sophia Valance 9294

This soft valance consists of a center section, two horns, and two side sections. All pieces sew together to create one valance before attaching to the mount board. The **valance depth is 18" at the center.** The **horn is 12 1/2" at the shortest point.** The **valance sides are about 49 1/2" deep.** Depth alterations are included, but all pieces must alter the same
amount.

The pattern will fit **windows 56" to 66" or wider.** It is not recommended for more narrow windows. The wide sides would close it up too much, and the center scallop section
would have to be too small in scale.

The **center section can be 14" to 24" wide.** You can alter it to be wider, or you can use more than one, with horns in between. The **side section finishes 21" wide (per side)** on
front of the board. Choices of return sizes are included on the pattern.

Fabric Suggestions: Medium to heavy fabrics work well, but must be soft. You can add interlining to light weight fabrics, if necessary. Stripes and plaids can also be used. This
valance should be self or contrast lined.

YARDAGE

To determine how wide the center section needs to be, subtract 42" from the finished width measurement (21" for each side section). The amount left is the size to use on the center section pattern. If more than one center section is needed, simply divide the measurement. No extra allowance is needed for the horns. To use the patterns, the **center section size must be between 14" to 24" wide** only.

With so many different fabric widths and repeats available today, we find it works best if we give you the actual pattern sizes so you can determine how they will fit on your fabric.

UPRIGHT CUT

Center section	the pattern is	your width plus 1" x 20" deep
Each horn	the pattern is	14" wide x 17" deep
Each side section (no seam)	the pattern is	52" wide x 52" deep
(or) If a seam is necessary in one side section		one cut @28" wide x 52" deep
		one cut @ 25" wide x 38" deep

Same amount of contrast lining will be needed.

Same amount of interlining (optional)

Yardage for Trims:

Trims must be able to curve	Center section	your width plus 2"
	Each horn	13"
	Each side section	63"

More detail information about yardage and alterations is given inside packet.
