

## Bombay Arched Valance

46" to 54" wide (Measuring straight across half circle at widest place)

9298

This casual arched valance has three sets of patterns. A set for windows **46" to 48" wide**, a set for windows **49" to 51" wide**, and a set for windows **52" to 54" wide**. Select your size group. Some of the valance sizes will have more slack than others. Example: The largest size in the group will have a flat fit. As the sizes get smaller in each group, there will be slightly more slack. It is not recommended that you use this pattern for sizes smaller than 46" because the side sections will hang at an inappropriate angle. You cannot add or take away sections on the arched window. **ALTERATION INSTRUCTIONS ARE NOT INCLUDED.**

The valance consists of three separate flat sections. Each section has an optional cuff that is sewn to the top and flips over to expose the contrast lining. The decorative tails are also optional. **The decorative tails hang about 19" and 24" deep.** They have no return. You can get a close idea how deep each valance section will hang by looking at the depth of the pattern pieces below. For installation, 4 holdbacks are needed. The valance will tie (or use an elastic loop) to the holdbacks.

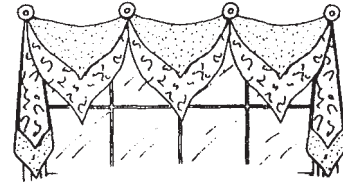

### Photo Cover:

Fabrics by: Richloom Fabrics Group

Valance: Brizio (color) caffè 1185

Lining: Klein (color) spice 1142

Finials: Screws directly into wall for no projection. Handpainted by M'Fay.

The center section and decorative tails can also be used together for straight windows, making this pattern versatile for rooms with more than one type of window.

**Fabric Suggestions:** Fabrics need to have body and softness. The valance has a lot of curved areas that may be easy to stretch. Add interlining to lightweight fabrics. Heavy fabrics and bulk are not a problem. Stripes and plaids work well. Contrast or self lining is needed for all pieces. Drapery lining will tend to show at the edges.

### YARDAGE

With so many different fabric widths and repeats available today, we find it works best if we give you the actual pattern sizes so you can determine how they will fit on the fabric.
