

# Waterford Valance

9335

This valance is made and attached to the mount board separately from the jabots. The valance has returns, the jabot does not.

**The valance width can be 36" or up to 60" wide. It is 21" deep at the sides and 12" near the center.** 1" of the middle (contrast) pleat is exposed. It is 11 1/2" deep there. The middle pleat will sew into the valance and become part of it.

**The jabot is 6" wide at the board line x 36" deep.** Alterations instructions for the depth of the valance and jabot are included.

**Fabric Suggestions:** Light to medium weight fabrics that have body. Avoid bulky fabrics. Add interlining to light weight fabrics. Stripe fabrics will work. The jabot should have a contrast lining. The middle pleat is the contrast fabric (not the valance fabric). The valance can line with a drapery lining. The lining may tend to show at the bottom edge if a trim or cord is not used.

## YARDAGE

With so many different fabric widths and repeats available today, we find it works best if we give you the actual pattern sizes so you can determine how they will fit on your fabric.

### Valance

Two cuts are needed for the valance. They will sew to each side of the middle pleat. The valance returns are included in the following measurements.

#### Upright Cut

36" wide valance .....	Two cuts @ 28" wide x 23" deep
48" wide valance .....	Two cuts @ 34" wide x 23" deep
60" wide valance .....	Two cuts @ 40" wide x 23" deep
Middle pleat.....	8" wide x 14" deep

**Lengthwise Cut:** The width measurement will run with the selvage.

### Jabot

The jabot has to be cut as two pieces (Piece A and Piece B). They sew together to become one unit.

Piece A .....	14" wide x 25" deep
Piece B.....	25" wide x 39" deep

This will create one jabot

Same amount of lining and (optional) interlining is needed for all items.

### TRIM (Trims must be able to curve)

#### Valance (includes returns and middle pleat)

36" valance .....	68"
48" valance .....	79"
60" valance .....	90"

**Jabot (one jabot) .....** 52"
