

# Concord Valance

9340

A choice of three different valance designs, using inverted pleats.

Measurements are given in sketch. Depth alterations will need to be done straight across at the top. No other alterations are given.

**Fabric Suggestions:** Use light to medium weight fabrics that are not too stiff. Add interlining to light weight fabrics. Stripes and plaids work well. Pleats are made from a contrast fabric, they should be self lined (some areas will show). View A side section should be self or contrast lined. Drapery lining can be used for the center section. However, lining may tend to show at the bottom edge if a trim or cord is not used.

## YARDAGE

With so many different fabric widths and repeats available today, we find it works best if we give you the actual pattern sizes so you can determine how they will fit on your fabric.

**Each valance center section can be 20" to 30" wide.** Two cuts are needed to make it complete. An inverted pleat is sewn between the two cuts.

**View A Upright Cut** Subtract 18" from the board face measurement (9" for each side section). The amount left will be for the center section. More than one complete center section can be used.

- 20" Center Sections .....2 cuts @ 11" wide x 20" deep
- 30" Center Sections .....2 cuts @ 16" wide x 20" deep
- Side Sections .....(one pair, one cut per jabot).....2 cuts @ 23" wide x 30" deep
- Long Inverted Pleat .....(middle of center section)..... 11" wide x 20" deep
- Short Inverted Pleat.....(each side of center section)..... 11" wide x 17" deep

**View B Upright Cut -** Divide board face measurement by number of complete center sections desired.

- Center Sections ..... same as View A
- Long Inverted Pleat .....(middle of center section) ..... 11" wide x 20" deep
- Short Inverted Pleat.....(each side of center section)..... 11" wide x 17" deep
- Returns....(two) ..... your width plus 1" x 17" deep

**View C Upright Cut -** Divide board face measurement by number of complete center sections desired.

- Center Sections ..... same as View A
- Short Inverted Pleat..... (middle of center section) ..... 11" wide x 17" deep
- Long Inverted Pleat .....(each side of center section)..... 11" wide x 20" deep
- Returns....two..... your width plus 1" x 20" deep

**Lengthwise Cut:** Pattern pieces can be overlapped for a seamless cut. The width measurement of the pattern pieces will run with the selvage. Fabric measurement will be same as pattern width.

Same amount of lining and (optional) interlining needed for all items. **(See fabric suggestions)**

### TRIM (Trims must be able to curve)

- Each complete 20" Center Section .... 22"
- Each complete 30" Center Section .... 32"
- Each View A Side Section ..... 28"
- Each Inverted Pleat ..... 10"
- Each Return..... your width
