

Point to Point Swags

44" to 54" Wide

14", 16", or 18" Depth

9344

These are the same as Medallion Swags except the outside ends can finish off, allowing it to hang alone. **There are no instructions to make the swags a different width or depth.** Other width sizes are available in patterns 9342 and 9343. **The Spiral Jabot depth is approximately 44". The Short Jabot depth is about 23".** The jabots do not have returns.

Swag Fabric Suggestions: Do not use bulky fabrics. Interlining is okay because it can be trimmed away from the pleat areas. Soft fabrics are best. Stripes and plaids are okay. Line with drapery lining.

Jabot Fabric Suggestions: Crisp fabrics work best. Use an interfacing in soft limp fabrics. Stripes, plaids, and directional designs will not hang straight. Since this jabot is cut in the form of a circle, the bottom edge will be on the bias. This means some fabrics will tend to sag and stretch. Using heavy trims on the bottom edge could increase this possibility. It is recommended that you use a fabric stabilizer on the face fabric and lining. Use a self or contrast lining.

YARDAGE

To know what size swag you need, measure straight across the area you plan to hang it. The amount for the droop area has already been added. Do not allow more.

With so many different fabric widths and repeats available today, we find it works best if we give you the actual pattern sizes so you can determine how they will fit your fabric.
